Substance and Function and Einstein's Theory of Relativity Ernst Cassirer, W. C. Swabey, M. C. Swabey, 2003-01-01
Double volume work features the establishment of a general philosophical system in which Einstein's theory of relativity is regarded as the natural progression of the motives inherent to mathematics and the physical sciences 1923 edition

Substance and Function, and Einstein's Theory of Relativity Ernst Cassirer, Marie Taylor Collins Swabey, 1923 The first part of the present book *Substanzbegriff und Funktionsbegriff* was published in 1910 while the second part which we have called the supplement *Zur Einsteinschen Relativitätstheorie* appeared in 1921 Bibliography p 457 460

Substance and Function Ernst Cassirer, 1953 Substance and function and Einstein's theory of relativity Ernst Cassirer, 1953

Substance and Function and Einstein's Theory of Relativity Ernst Cassirer, 1953 SUBSTANCE AND FUNCTION, AND EINSTEIN'S THEORY OF RELATIVITY ERNST. CASSIRER, 2018 **The History of Continental Philosophy** Alan D.

Schrift, 2013-04-12 From Kant to Kierkegaard from Hegel to Heidegger continental philosophers have indelibly shaped the trajectory of Western thought since the eighteenth century Although much has been written about these monumental thinkers students and scholars lack a definitive guide to the entire scope of the continental tradition The most comprehensive reference work to date this eight volume *History of Continental Philosophy* will both encapsulate the subject and reorient our understanding of it Beginning with an overview of Kant's philosophy and its initial reception the *History* traces the evolution of continental philosophy through major figures as well as movements such as existentialism phenomenology hermeneutics and poststructuralism The final volume outlines the current state of the field bringing the work of both historical and modern thinkers to bear on such contemporary topics as feminism globalization and the environment Throughout the volumes examine important philosophical figures and developments in their historical political and cultural contexts The first reference of its kind *A History of Continental Philosophy* has been written and edited by internationally recognized experts with a commitment to explaining complex thinkers texts and movements in rigorous yet jargon free essays suitable for both undergraduates and seasoned specialists These volumes also elucidate ongoing debates about the nature of continental and analytic philosophy surveying the distinctive sometimes overlapping characteristics and approaches of each tradition

Featuring helpful overviews of major topics and plotting road maps to their underlying contexts *A History of Continental Philosophy* is destined to be the resource of first and last resort for students and scholars alike The Semantic Tradition

from Kant to Carnap Alberto Coffa, J. Alberto Coffa, 1991 J Albert Coffa traces the roots of logical positivism in a semantic tradition that arose in opposition to Kant's theory that a priori knowledge is based on pure intuition The New Century

Keith Ansell-Pearson, Alan D. Schrift, 2014-09-03 This volume covers the period between the 1890s and 1930s a period that witnessed revolutions in the arts and society which set the agenda for the rest of the century In philosophy the period saw the birth of analytic philosophy the development of new programmes and new modes of inquiry the emergence of

phenomenology as a new rigorous science the birth of Freudian psychoanalysis and the maturing of the discipline of sociology This period saw the most influential work of a remarkable series of thinkers who reviewed evaluated and transformed 19th century thought A generation of thinkers among them Henri Bergson Emile Durkheim Sigmund Freud Martin Heidegger Edmund Husserl Karl Jaspers Max Scheler and Ludwig Wittgenstein completed the disenchantment of the world and sought a new re enchantment

Collected Papers VI. Literary Reality and Relationships Alfred Schutz, 2012-10-13 This book contains texts devoted by Alfred Schutz to the normative areas of literature and ethics It includes writings dealing with the author reader relationship multiple realities the literary province of meaning and Schutz's views on equality Never published in English commentaries on Goethe's novel and the account of personality in the social world appear in this volume

Cassirer Samantha Matherne, 2021-04-25 Ernst Cassirer 1874 1945 occupies a unique place in 20th century philosophy His view that human beings are not rational but symbolic animals and his famous dispute with Martin Heidegger at Davos in 1929 are compelling alternatives to the deadlock between analytic and continental approaches to philosophy An astonishing polymath Cassirer's work pays equal attention to mathematics and natural science but also art language myth religion technology and history However until now the importance of his work has largely been overlooked In this outstanding introduction Samantha Matherne examines and assesses the full span of Cassirer's work Beginning with an overview of his life and works she covers the following important topics Cassirer's neo Kantian background Philosophy of mathematics and natural science including Cassirer's first systematic work *Substance and Function* and subsequent works like Einstein's Theory of Relativity The problem of culture and the ground breaking *The Philosophy of Symbolic Forms* Cassirer's ethical and political thought and his diagnosis of fascism in *The Myth of the State* Cassirer's influence and legacy Including chapter summaries suggestions for further reading and a glossary of terms this is an ideal introduction to Cassirer's thought for anyone coming to his work for the first time It is essential reading for students in philosophy as well as related disciplines such as intellectual history art history politics and literature

Formation And Logic Of Quantum Mechanics, The (In 3 Vols) Masayuki Nagasaki, Mituo Taketani, 2001-11-23 This book analyzes the intricate logical process through which the quantum theory was developed and shows that the quantum mechanics thus established is governed by stereo structural logic The method of analysis is based on Mituo Taketani's three stage theory of scientific cognition which was presented and developed in close connection with Yukawa's theory of the meson According to the three stage theory scientific cognition proceeds through a series of coiling turns of the phenomenological substantialistic and essentialistic stages The old quantum mechanics is shown to be in a substantialistic stage followed by the quantum mechanics in the corresponding essentialistic stage a

Substance and Functions, and Einstein's Theory of Relativity Ernst Cassirer, 1923 *Space, Number, and Geometry from Helmholtz to Cassirer* Francesca Biagioli, 2016-08-22 This book offers a reconstruction of the debate on non Euclidean geometry in neo Kantianism between the second half of the nineteenth century and the first decades of the twentieth century Kant famously characterized space and time as a priori forms of intuitions which lie at the foundation of mathematical knowledge The success of his philosophical account of space was due not least to the fact that Euclidean geometry was widely considered to be a model of certainty at his time However such later scientific developments as non Euclidean geometries and Einstein's general theory of relativity called into question the certainty of Euclidean geometry and posed the problem of reconsidering space as an open question for empirical research The transformation of the concept of space from a source of knowledge to an object of research can be traced back to a tradition which includes such mathematicians as Carl Friedrich Gauss Bernhard Riemann Richard Dedekind Felix Klein and Henri Poincaré and which finds one of its clearest expressions in Hermann von Helmholtz's epistemological works Although Helmholtz formulated compelling objections to Kant the author reconsiders different strategies for a philosophical account of the same transformation from a neo Kantian perspective and especially Hermann Cohen's account of the apriority of mathematics in terms of applicability and Ernst Cassirer's reformulation of the a priori of space in terms of a system of hypotheses This book is ideal for students scholars and researchers who wish to broaden their knowledge of non Euclidean geometry or neo Kantianism Introduction to Elliptic Functions Frank Bowman, 1961 The purpose of this book is to give a short practical introduction to some applications of elliptic functions it is confined to the Jacobian functions the Weierstrassian function is not even mentioned preface to the first edition *The Art which Mends Nature* Eric Aalen MacDonald, 2006
