

Quality

"Quality", known as a degree of excellence, refers to how good something is compared to other similar activities, actions, or products. A business entails several aspects of quality revolving around goods or services it produces. How good or 'fit for purpose' these goods are deep rooted in the concept of Quality Management (QM), which covers four major areas:

1 Quality Planning

This aspect answers the question – 'How?' Planning involves developing the goods, services, and processes required to meet and often exceed client's expectations. It is important for every business to identify the expectations and curate a scalable structure that enables teams to consistently achieve and exceed quality expectations.

2 Quality Assurance

Quality Assurance (QA) is a program for the systematic monitoring of all aspects of a project, aimed at ensuring that the processes being followed meet the required standards. QA primarily focus on the processes & procedures that improves quality, including training, documentation, monitoring, and audits, it relates to how a process is performing and how to prevent mistakes/defects.

3 Quality Control

Quality Control (QC) is a procedure or set of procedures intended to ensure that a manufactured product or performed services adheres to the client's requirement. There are various ways to perform QC, including benchmarking, data analysis, sampling, documentation, and continuous improvement.

4 Quality Improvement

Quality Improvement includes trainings, ideation drive within the process, and support Six sigma and Lean projects implementations, it is an ongoing process of identifying and addressing problems to improve quality. Various tools are used by business team to ease the quality improvement process, including flowcharts, check sheets, Pareto diagrams, cause-and-effect diagrams, histograms, scatter diagrams, and control charts.
