Postmodern Philosophy and the Scientific Turn Dorothea Olkowski, 2012-04-23 What can come of a scientific engagement with postmodern philosophy Some scientists have claimed that the social sciences and humanities have nothing to contribute except perhaps peripherally to their research Dorothea E Olkowski shows that the historic link between science and philosophy mathematics itself plays a fundamental role in the development of the worldviews that drive both fields Focusing on language its expression of worldview and usage she develops a phenomenological account of human thought and action to explicate the role of philosophy in the sciences Olkowski proposes a model of phenomenology both scientific and philosophical that helps make sense of reality and composes an ethics for dealing with unpredictability in our world

Minimal Theologies Hent de Vries, 2019-12-01 Originally published in in 2004 What at this historical moment after Auschwitz still remains of the questions traditionally asked by theology What now is theology's minimal degree This magisterial study the first extended comparison of the writings of Theodor W Adorno and Emmanuel Levinas explores remnants and echoes of religious forms in these thinkers critiques of secular reason finding in the work of both a theology in pianissimo constituted by the trace of a transcendent other The author analyzes systematizes and formalizes this idea of an other of reason In addition he frames these thinkers innovative projects within the arguments of such intellectual heirs as Jürgen Habermas and Jacques Derrida defending their work against later accusations of performative contradiction by Habermas or empiricism by Derrida and in the process casting important new light on those later writers as well Attentive to rhetorical and rational features of Adorno's and Levinas's texts his investigations of the concepts of history subjectivity and language in their writings provide a radical interpretation of their paradoxical modes of thought and reveal remarkable and hitherto unsuspected parallels between their philosophical methods parallels that amount to a plausible way of overcoming certain impasses in contemporary philosophical thinking In Adorno this takes the form of a dialectical critique of dialectics in Levinas that of a phenomenological critique of phenomenology each of which sheds new light on ancient and modern questions of metaphysics

Stephen Jaeger,2002 The creative and intellectual life of the early and high Middle Ages in the West was sustained by learned worldly clerics Their rich culture was slow to be discovered in its fullness partly because church history tended to dominate perspectives on clerical life while the chivalric literature of the courts was seen as reflecting values and ideals of secular culture however busy clerical authors may have been in the recording of it These essays bring new approaches to these questions showing the deep and decisive engagement of clerical scholars and courtiers in the major realms of medieval secular intellectual and social life Medieval humanism cathedral school education courtly love and courtesy and the renaissance of the 12th century are among the topics covered Orpheus in the Eleventh Century illuminates the function and nature of Latin poetry in both the schools and society two essays focus on Abelard while others reconsider the historical relationship of 11th century worldly culture to that of the 12th The author suggests a cultural unity of schools cathedral communities and secular courts created by this class of scholar courtiers

Human Diversity and the Culture Wars Philip E. Devine,1996-11-30 Raising the war on political correctness to a new and higher intellectual level Philip Devine sheds fresh light on the whole question of cultural standards and the fashionable notion of multiculturalism While acknowledging the diversity of ways of life and the differing belief systems that arise from and justify those ways of life the author attacks the current exploitation of diversity to justify a militantly intolerant relativism His wide ranging and erudite work connects cultural issues to our real world existence as biological and historical beings pulling together ideas of bioethics education and the structure and purpose of families This work will be of interest to those fighting the culture wars across the humanities and social and behavioral sciences Philosophical Writings ,2000
