Although many of the models presented here have been successful only in clinical trials and efficacy is not yet confirmed by controlled research, the principles used in the development of these models hopefully will have value in assisting clinicians, managers, and planners who have an immediate need to provide services to this population. Consumer-Run Mental Health Louis D. Brown, 2011-10-23 Consumer-run organizations and other types of mental health self-help are becoming increasingly popular in the public mental health system. These initiatives now outnumber traditional mental health organizations in the US. Goldstrom et al 2006. This growth is due in large part to their low cost, devoted supporters, burgeoning evidence base, and increased acceptance by mental health professionals. International interest in these initiatives is also growing as self-help is flourishing in industrialized countries worldwide. I recently edited a special issue on mental health self-help for the *American Journal of Community Psychology* and we received submissions from five continents with exciting work coming out of China, Australia, and Europe. The proposed book develops a rich theoretical model called the

Role Framework which explains how people engage in and benefit from mental health consumer run organizations CROs

**Personal Recovery and Mental Illness** Mike Slade, 2009-05-28 Recovery is a concept which has emerged from the experiences of people with mental illness It involves a shift away from traditional clinical preoccupations such as managing risk and avoiding relapse towards new priorities of supporting the person in working towards their own goals and taking responsibility for their own life This book sets an agenda for mental health services internationally by converting these ideas of recovery into an action plan for professionals The underlying principles are explored and five reasons identified for why supporting recovery should be the primary goal A new conceptual basis for mental health services is described the Personal Recovery Framework which gives primacy to the person over the illness and identifies the contribution of personal and social identity to recovery These are brought to life through twenty six case studies from around the world

*Contemporary Issues in Mental Health Nursing* Jonathon E. Lynch, Steve Trenoweth, 2008 This title addresses some of the most prominent issues currently being faced in mental health nursing and provides a series of essays which critique and commentate on the current standing of the profession within a contemporary context

**In Recovery** Nora Jacobson, 2004 For hundreds of years people diagnosed with mental illness were thought to be hopeless cases destined to suffer inevitable deterioration Beginning in the early 1990s however providers and policymakers in mental health systems came to promote recovery as their goal But what does recovery truly mean For example to consumers of mental health services it implies empowerment and greater resources dedicated to healing to HMOs it can suggest a means of cost savings when benefits cease upon recovery This book considers recovery from multiple angles Traditionally Nora Jacobson notes recovery was defined as symptom abatement or a return to a normal state of health but as activists mental health professionals and policymakers sought to develop recovery oriented systems other meanings emerged Jacobson s analysis describes the complexes of ideas that have defined recovery in various contexts over time The first meaning recovery as evidence involves the theories statistics therapies legislation and myriad other factors that constituted the first one hundred years of mental health services provision in the United States Recovery as experience brought the voices of patients into the conversation while recovery as ideology drew on both recovery as evidence and recovery as experience to rally support for specific approaches and service delivery models This in turn became the basis for recovery as policy which developed as assorted representative bodies such as commissions and task forces planned reforms of the mental health system Finally recovery as politics emerged as reformers confronted harsh economic realities and entrenched ideas about evidence experience and ideology Throughout Jacobson draws on her research in Wisconsin a state with a long history of innovation in mental health services Her study there included several years of fieldwork and interviews with the government appointed groups charged with making recovery policy Thus *In Recovery* also provides an inside account of the process of policy development and implementation
