Understanding the Islamic Explosion Bernard Palmer, 1980 *The complete guide to knowing the truth about islam* The complete guide, 2025-11-22 At a time when Islam occupies a central place in the news and debates surrounding its history foundational texts and contemporary applications are more polarized than ever the need for an accessible precise and uncompromising synthesis is essential Many works already exist some are written by specialists for specialists others avoid uncomfortable questions while others still descend into either apology or caricature This complete guide sets a different objective to offer the general public from the simply curious to the already informed reader a clear structured and richly sourced presentation of what the foundational texts of Islam Quran authentic hadiths classic biographies of the Prophet actually say their majority interpretation throughout history and the concrete consequences these sources have had and still have in many countries Without academic jargon or evasive language this book aims to allow everyone to form their own opinion based on facts and primary sources *Lectures on Central Asia* H. Phil., historical essays **A Theory of International Terrorism** L. Ali Khan, 2006-06-01 A Theory of International Terrorism studies Islamic militancy in the geopolitical contexts of Chechnya Kashmir Palestine and the September 11 attacks on the United States These contexts have shaped a global ontology of Islamic terrorism which asserts that puritan Islam is inherently violent and Muslim militants are addicted to carnage This ontology is significantly changing international law It defends the preemptive war on terror and disregards civil liberties prescribing extra judicial killings torture renditions indefinite detentions and numerous other human rights violations These normative shifts are considered inevitable to suppress Muslim militants Questioning these shifts the book argues that the policy of no negotiations with Muslim militants is contrary to the UN Charter It also argues that terrorism cannot be eradicated unless the Nation State evolves into the Free State a concept developed in *The Extinction of Nation States* 1996 and *A Theory of Universal Democracy* 2003 Universities

Charny, 2006-11-30 How does one effectively fight suicide bombers What threat do they hold for Western society How do people who love peace reconcile the need for war Noted genocide expert Israel W Charny addresses these questions in this highly personal description of suicide bombings and terror as the opening salvos of a Third World War Charny first seeks to understand what makes suicide bombers tick as well as the culture from which they emerge Taking this understanding of what he calls human evil he then proposes a hawkish campaign that ultimately emphasizes peace rather than irrational fear By deeming suicide bombing and terrorism as necessary subjects in the study of psychology Charny presents yet another weapon in the war against terrorism a war that he believes will only escalate without drastic action Ultimately he calls for a worldwide campaign for life led by religious and secular leaders across the globe He concludes the book with a vignette from Islamic culture that speaks nobly to furthering peace and life
