Understanding The Language Classroom:

   Understanding the Language Classroom S. Gieve,I. Miller,2005-11-30 The starting point for this collection is a chapter by Dick Allwright on the language learning and teaching classroom experience entitled Six Promising Directions in Applied Linguistics The other distinguished contributors respond to this discussion with their own interpretations and from their own experience The collection problematizes prescription efficiency and technical solutions as orientations to classroom language learning Complexity and idiosyncrasy on the other hand are recognized as central concepts in a move towards centralizing teachers and learners own understanding of classroom life in the contexts of language learning adult literacy education and language teacher education   Understanding Language Classroom Contexts Martin Wedell,2013 Arguably the whole point of education is to effect change in what people know and are able to do Globalization has contributed to a common perception worldwide of the need to introduce changes to the teaching and learning of languages The success of many attempts to do so has been limited by insufficient consideration of implementation contexts Understanding Language Classroom Contexts explores and illustrates how what happens in any language classroom is influenced by and can be an influence on the contexts in which it is situated A clear understanding of these influences is thus the starting point for planning effective change The book considers many visible and invisible features of the multiple layers of any context and provides a framework for understanding the types of factors that may influence whether changes planned by a teacher or externally initiated are likely to be successful The book will help teachers and educational managers or change planners outside the classroom to understand why their classrooms are as they are and so to make informed decisions about what can or cannot or not easily be changed and suggests how any changes might be appropriately managed EBL   *Understanding Language Classroom Contexts* Martin Wedell,Angi Malderez,2013-06-06 Guide enabling ELT practitioners to understand their context and its influence on the language teaching learning process and the implementation of change in classrooms

Al-Hoorie,Sarah Mercer,2020-12-02 This book defines engagement for the field of language learning and contextualizes it within existing work on the psychology of language learning and teaching Chapters address broad substantive questions concerned with what engagement is or looks like and how it can be theorized for the language classroom methodological questions related to the design measurement and analysis of engagement in language classrooms and beyond as well as applied issues examining its antecedents factors inhibiting and enhancing it and conditions fostering the re engagement of language learners who have become disengaged Through a mix of conceptual and empirical chapters the book explores similarities and differences between motivation and engagement and addresses questions of whether how and why learners actually do exert effort allocate attention participate and become involved in tangible language learning and use It will serve as an authoritative benchmark for future theoretical and empirical research into engagement within the classroom and beyond and will be of interest to anyone wishing to understand the unique insights and contributions the topic of engagement can make to language learning and teaching **Understanding Communication in Second Language Classrooms** , *Understanding Language Use in the Classroom* Susan J. Behrens,2014-05-01 It is clear that a proper understanding of what academic English is and how to use it is crucial for success in college and yet students face multiple obstacles in acquiring this new code not least that their professors often cannot agree amongst themselves on a definition and a set of rules Understanding Language Use in the Classroom aims to bring the latest findings in linguistics research on academic English to educators from other disciplines and to help them help their students learn and achieve Behrens combines a powerful argument for the importance of explicit teaching of language skills in college with answers to common questions from professors and students as well as sample teaching materials to help make these issues come alive in the classroom The Dynamics of the Language Classroom Ian Tudor,2001 Second and Foreign Language Learning Through Classroom Interaction Joan Kelly Hall,Lorrie Stoops Verplaetse,2000-06-01 This volume brings together the current theoretical interest in reconceptualizing second and foreign language learning from a sociocultural perspective on language and learning with practical concerns about second and foreign language pedagogy It presents a set of studies whose focus is on the empirical description of particular practices constructed in classroom interaction that promote the learning of a second or foreign language The authors examine in detail the processes by which the learning of additional languages is accomplished in the interaction of a variety of classrooms and in a variety of languages Not only will the findings from the studies reported in this volume help to lay a foundation for the development of a more expansive sociocultural model of second and foreign language learning but on a more practical level

they will help language educators in creating a set of principles for identifying and sustaining classroom interactional practices that foster additional language development The volume is distinguished in three ways Following a Vygotskyan perspective on development the studies assume that language learning is a fundamentally pragmatic enterprise intrinsically linked to language use This breaks from a more traditional understanding of second and foreign language learning which has viewed learning and use as two distinct phenomena The importance of classroom interaction to additional language development is foregrounded The investigations reported in this book are distinguished by their methodological approach Because language learning is assumed to be a situated context sensitive and dynamic process the studies do not rely on traditional experimental methods for collecting and analyzing data but rather they involve primarily the use of ethnographic and discourse analytic methods The studies focus on interactional practices that promote second and foreign language learning Although a great deal of research has examined first language learning in classrooms from a sociocultural perspective little has looked at second and foreign language classrooms from such a perspective Thus there is a strong need for this volume of studies addressing this area of research Researchers teacher educators and graduate students across the fields of second and foreign language learning applied linguistics and language education will find this book informative and relevant Because of the programmatic implications arising from the studies it will also appeal to teacher educators and teachers of second and foreign languages from the elementary to the university levels   **Understanding Second Language Process** Zhaohong Han,Eun Sung Park,2008 This book assembles 11 analytical and empirical studies on the process of second language acquisition probing a wide array of issues from transfer appropriate processing to L2 default processing strategies among hearing or deaf learners of a variety of target languages including English Japanese Chinese Korean French Spanish and American Sign Language Although instruction per se is not the focus of this volume the chapters are written with instructed learners in mind and hence offer valuable insights for both second and foreign language researchers and practitioners   **Understanding Expertise in Teaching** Amy Tsui,2003-04-07 Table of contents
