Sustainable Development Through Northern Conservation Strategies:

Sustainable Development Through Northern Conservation Strategies Banff Centre. Resource Management Program, 1990
Purpose of volume is to develop perspectives and guidelines relevant to the design and implementation of territorial and marine conservation strategies and to scale these to both locally based plans and broader circumpolar interests Constitutes the proceedings of a workshop Considers the process of design and implementation of conservation strategies for achieving sustainable development in the Canadian North

Communities, Development, and Sustainability across Canada John T. Pierce, Ann Dale, 2011-11-01 What is a sustainable community The pressing need to answer this simple question is what prompted John Pierce and Ann Dale to gather the essays in this volume *Communities Development and Sustainability across Canada* is a timely synthesis of work on how Canadian communities can achieve sustainable development It bridges the gap between theory and praxis and brings together academics policy makers and community activists all of whom have argued for increased local participation in sustainable community development Communities have become the weak link in efforts to refashion relations between the environment and the economy The goal of this book is not simply to describe problems but also to suggest answers not simply to offer theory but also to promote action so that Canadian communities can better achieve sustainable development The twelve essays are organized into four sections Vision Connections Action and Assessing Progress The first and last sections discuss local sustainable development within the context of increasing globalization The second section approaches sustainable development from the perspective of social evolution and urban systems The third section the heart of the book is comprised of three community case studies an assessment of the Pacific salmon fishery and four general discussions of sustainable development The conclusion reiterates the need to make communities stronger links in sustainable development The message of *Communities Development and Sustainability across Canada* is clear it is time for communities themselves to act if they are to achieve sustainable development This provocative and persuasive book will prove to be a valuable guide to taking the first steps

Coastal Zone Management Imperative for Maritime Developing Nations B.U. Haq, Gunnar Kullenberg, Jan H. Stel, 2013-03-09 Anthropogenic transformation of the coastal zone continues at a steady pace especially in the developing maritime countries where coastal resources are often crucial to national economies However exploitation of these resources is often indiscriminate ill planned or carried out without adequate scientific knowledge This leads to rapid resource depletion and often irreversible environmental degradation The 1992 Rio de Janeiro UN Conference on Environment and Development recognized the expediency of an

integrated and sustainable use of all coastal resources functions and services grounded on sound scientific data The present volume is based on the 1994 international workshop Integrated Coastal Zone Management and brings together contributions by leading specialists both on basic concepts and on applications of coastal management The work is divided into six parts dealing with the conceptual framework of ICZM regional and global aspects of coastal management environmental assessment in ICZM capacity building and technology transfer monitoring and environmental analysis and case studies and status of ICZM plans The book also incorporates an interactive ICZM planning module COSMO which can be of use in designing a management plan for a coast Attention is also given to long term environmental effects of present day actions It is hoped that COSMO will prove an additional learning tool for ICZM practitioners and enhance the value of the book This work is intended to give a broad coverage of conceptual and technical aspects of ICZM and will be of use to operational executives as well as students of ICZM environmental economists policy makers and senior managers in the international development agencies and governmental and non governmental organizations It can be recommended as a textbook and as a reference work
