us how the world works Film here is action energy matter moving across space to forge connections provide encounters and create schisms in our knowledge of others The book brings together key thinkers of the contemporary in an innovative exchange between film and theory Marc Auge s concept of non place is brought to bear on and disrupt the category of national cinema Manuel DeLanda s notion of morphogenesis frames an understanding of film as a process of constant evolution in which the terms of change are immanent to matter itself And the concept of inertia from Paul Virilio s work allows us to comprehend the different energies of film Arguing that there is no higher position from which to view the present either in theory or in film we move blindly and yet with faith discovering the present frame by frame The Evolution of Film demonstrates how this is an intangible yet critical medium in the contemporary mediating relationships to place technology and thought itself The Evolution of Film will be essential reading for students and scholars of film at all levels
