Arthur J. Baroody, Arthur J. Baroody, Jesse L.M. Wilkins, Ronald T. Coslick, 1998-09-01 Teachers have the responsibility of helping all of  
their students construct the disposition and knowledge needed to live successfully in a complex and rapidly changing world  
To meet the challenges of the 21st century students will especially need mathematical power a positive disposition toward  
mathematics curiosity and self confidence facility with the processes of mathematical inquiry problem solving reasoning and  
communicating and well connected mathematical knowledge an understanding of mathematical concepts procedures and  
formulas This guide seeks to help teachers achieve the capability to foster children s mathematical power the ability to excite  
them about mathematics help them see that it makes sense and enable them to harness its might for solving everyday and  
extraordinary problems The investigative approach attempts to foster mathematical power by making mathematics  
instruction process based understandable or relevant to the everyday life of students Past efforts to reform mathematics  
instruction have focused on only one or two of these aims whereas the investigative approach accomplishes all three By  
teaching content in a purposeful context an inquiry based fashion and a meaningful manner this approach promotes children s  
mathematical learning in an interesting thought provoking and comprehensible way This teaching guide is designed to help  
teachers appreciate the need for the investigative approach and to provide practical advice on how to make this approach  
happen in the classroom It not only dispenses information but also serves as a catalyst for exploring conjecturing about  
discussing and contemplating the teaching and learning of mathematics
