The Hitler Schiller Institute:

The Hitler Book Helga Zepp-LaRouche, Was Hitler just a lone assassin of nations just a crazy fanatic who somehow managed to take power in a powerful nation and threaten world domination and destruction Do all Germans genetically have fascist tendencies The short answer is No to both of these mythologies and numerous others from Hollywood and similar places Yet despite the importance of the subject and shelves full of books and scholarly writings on the topic only this study by Helga Zepp LaRouche and a Schiller Institute research team actually approximates a thorough analysis of Hitler and the NAZI movement its origins and mystical philosophy its fascist economic policies its race science its backers and promoters its drug and gun running its terrorism and assassinations Most importantly this book tracks the NAZI apparatus transformation into today s Green anti human movement and religious terrorism At the end of the war intelligence services engaged in a mad scramble to preserve and take over the NAZI old boys networks Don t be so sure that the old swastika is gone for good Trappings and tactics have changed somewhat but the threat of global destruction is still hanging over us Read this book and ensure that mankind can overcome the continuing menace and create a future of progress for all *Development is the Name for Peace* Lyndon LaRouche, Helga Zepp-LaRouche, Fred Wills,101-01-01 [The Power of Reason 1988](#) Lyndon H. LaRouche, Jr.,2015-09-02 From the Author s Foreword 1987 During the course of the past nearly twenty years I have become perhaps the most controversial among the influential international figures of this decade Unlike all of the other leading candidates for the U S presidency since 1945 I am an influential original thinker This is not to suggest that such prospective candidates as Vice President George Bush and Senator Robert Dole are lacking in intelligence or executive abilities For the past forty years the successful candidates for the presidency have been persons who in the customary manner of speaking advanced their political career up to that point by doing the right thing at the right time saying and doing nothing which will make enemies among important factions of the establishment Bush and Dole for example have adapted to those rules for success under ordinary conditions However this is a crisis in such crises what is customarily successful becomes a failure Our nation has once again entered into a time when only the unusual succeeds and the usual fails We have entered into a period of crisis in which only original thinkers are qualified to lead On paper our nation is a constitutional democratic republic In reality it has not been such a republic for approximately one hundred years certainly not since the sweeping changes in our form of government introduced during the presidency of Theodore Roosevelt Most of the time the policies of government the selection of most leading candidates for federal office and the majority of popular opinion have been regulated by behind the scenes committees representing what is called the establishment Under this arrangement candidates for leading office present themselves like job applicants for corporate executive appointments to this establishment The establishment either gives such candidates permission to campaign or not at this time If given such permission the candidate so authorized seeks backing for his or her election by the establishment by proving to the establishment that he or she can

sell the policy which the establishment has decided to push at that time I began to understand this in 1947 I wished General Dwight Eisenhower to campaign for the 1948 Democratic nomination The general replied to me stating agreement with my policy arguments in support of his candidacy but informing me his candidacy was not appropriate at that time There is no doubt that Eisenhower could have won the 1948 nomination and election by a landslide had the establishment permitted him to campaign Saint Augustine, Father of European and African Civilization Helga Zepp-LaRouche, Lyndon LaRouche,

Colonize Space! Helga Zepp-LaRouche, Lyndon LaRouche, 2016-03-09 Krafft Ehrlicke who died in December 1984 made major contributions to the U S space program and laid the foundation for man s coming industrialization of the Moon and civilizing of the solar system This book presents the proceedings of an extraordinary conference held June 15 16 1985 in Reston Virginia in memory of space scientist Krafft A Ehrlicke The Fusion Energy Foundation and the Schiller Institute convened the conference to bring together a group of international military scientific diplomatic and community leaders who would take responsibility for solving the profound crisis gripping the world Titled *The Age of Reason in a World of Mutually Assured Survival and Space Colonization* the conference discussed scientific breakthroughs in the beam defense program and the classical scientific method that led to these breakthroughs Like Krafft Ehrlicke the participants shared a cultural optimism that insists that today s strategic crisis can be overcome Proposed was an international crash program approach to rescue mankind from disaster by lifting the eyes of the world to the stars using a successful beam defense program as a first step along the way to industrializing and colonizing the Moon and Mars Adolf Hitler and the Nazi Epoch Paul

Madden, 1998-11-05 Although bibliographies do exist that concern themselves with the Nazi period in Germany and the Third Reich no one has yet attempted a complete reference source With the publication of *Adolf Hitler and the Nazi Epoch* there is finally a complete comprehensive reference source designed to identify all English language works that relate to the Nazis and the Third Reich Included in this bibliography are monographs biographies pamphlets and journal articles as well as more general histories of the time period The material is subdivided by subject and organized into eighteen chapters making this large bibliography simple to use The chapter subjects contain a broad range of data Included are chapters on Adolf Hitler himself the origins of national socialism religion and the Nazis articles about education and academics in Germany law and government under the Third Reich the SS and concentration camps everyday life in Nazi Germany foreign policy and more The range of data collected in this one reference location is astounding and should provide a nearly inexhaustible starting point for those scholars and students interested in the history of one of the most controversial political parties and governments of the twentieth century Crimes Against Humanity Rolf A.
