# The Human Personality

**Agostino Gemelli (O.F.M.)**

## **The Human Personality:**

**The Human Personality** Dean Diggins, Jack T. Huber, 1976-01-01      **The Structure of Human Personality** (Psychology Revivals) H.J. Eysenck, 2013-06-06 This collection of twenty books is a chance to discover a diverse range of topics across the behavioural sciences From cognitive to social psychology psychiatry to psychoanalysis and many others in between It includes early works from psychologists who went on to become leaders in their fields as well as shaping the world of psychology as we know it today A great opportunity to acquire an eclectic mix of psychology titles from throughout the twentieth century      *The Structure of Human Personality* Hans Jurgen Eysenck, 1953      The human personality in modern applied psychology Agostino Gemelli (O.F.M.),      **The Nature of Human Personality** G. N. M. Tyrrell, 2019-03-04 For over thirty years G N M Tyrrell devoted himself to the study of psychical phenomena Originally published in 1954 in his last book written just before his death he probes as deeply as possible into the meaning of the results of psychical research He believes that paranormal phenomena are not isolated occurrences due to the exceptional gifts of a few unusual persons but the result of capacities which all human beings possess though in widely varying degrees After an introductory chapter on Psychology and Psychiatry the chief psychical phenomena extra sensory perception mediumship apparitions etc are discussed and illustrated Then follows a general criticism of current attitudes towards the subject The book ends with two chapters arguing that the normal and paranormal are one and suggesting a pathway to religion      **The Human Personality** Jerome L. Singer, 1984-01-01      **The Human Personality** Jerome L. Singer, 1996 Textbook      **A Theory of the Human Personality** Lisle James Koch, Bernard Kleinman, 1965 The problem of understanding the human personality faces each new generation Everyone has implicit ideas of how and why people behave as they do but to formalize in systematic fashion those ideas is another matter and the problem of personality theorizing This paper has attempted to set forth some basic criteria for developing a theory of personality which includes relevance brevity and clarity internally consistent assumptions and propositions scope and comprehensiveness adequate communication and consideration of individual and group norms This theory of personality attempts to present a real person theory whose personality structure has been divided into three major divisions explicitly state by Christ himself in Matthew 22 37 Thou shall love the Lord thy God with all thy heart with all thy mind and with all thy strength 1 Kardia which is the heart containing the seat of man s willing feelings and emotions 2 Psyche which is the soul or life energy principle of man s body spirit and kinesthetic sensing 3 Dianoia which is the full intellect of man which understands makes insightful decisions makes value judgements and possesses a knowledge shared with himself by way of a conscience These structural aspects are structurally similar to Freud s tripartite structure of personality These similarities and many others illustrated in this paper suggest a thread of unity in historical and current conceptualization of what the human personality is and how it behaves and interacts intrapsychically and interpersonally The dynamic overlap and interaction of the concepts also suggest that personality theory must remain a

dynamic and evolving discipline in the study of human nature and behavior in as much as it is ever dealing with a changing individual who lives in ever changing situations Man an Organic Community John H. Singer, Jerome Kagan, 1984 The Human Connectome Kostas N. Fountoulakis, 2022-12-08 This book constitutes the end result of 20 years long effort that goes beyond a Psychiatrist s standard clinical training and education even that of a Psychiatrist that follows an academic career Trying to explain how the human mind works is hard and the heterogeneity of the audience make the attempt even more difficult There is a conceptual difference between the words brain and mind and this makes the effort even more difficult since the present book tries to preserve the strict scientific approach concerning all the topics discussed The work elaborates and tries to answer questions frequently phrased

by audiences in teaching classes and in conferences and does not avoid any question In order to achieve this goal it is structured in chapters all the way from the molecule and the cell to consciousness and free will The book targets mainly the mental health care professionals as an audience and to a lesser extend the other health professionals It is written according to the author s view concerning the training and educational needs of Psychiatrists and Psychologists and to a lesser degree of Neurologists and Neuroscientists in general
