Writing and Responsibility Carl Tighe, 2005-07-12 In a world where literary scandals often end up in court the issue of responsibility in writing has never been more important In this groundbreaking study Carl Tighe asks the questions every writer needs to consider What is it that writers do Are they responsible for all the uses to which their writing might be put Or no more responsible than their readers How are a writer s responsibilities compromised or defined by commercial or political pressures or by notions of tradition or originality How does a writer s audience affect their responsibilities Are these the same for writers in all parts of the world under all political and social systems The first part of this book defines responsibility and looks at its relation to ideas such as power accuracy kitsch and political correctness The second part examines how particular writers have dealt with these issues through a series of often controversial case studies including *American Psycho* *Crash* and *The Tin Drum* *Writing and Responsibility* encourages its readers to interrogate the choices they make as writers A fascinating look at the public consequences of the private act of

Science, Myth, and the Fictional Creation of Alien Worlds Albert Wendland, 1985

Women Musicians in Victorian Fiction, 1860-1900 Phyllis Weliver, 2016-07-28

Over the first half of the nineteenth century writers like Austen and Brontë confined their critiques to satirical portrayals of women musicians. Later, however, a marked shift occurred with the introduction of musical female characters who were positively to be feared. First published in 2000, this book examines the reasons for this shift in representations of female musicians in Victorian fiction from 1860-1900. Focusing on changing gender roles, musical practices, and the framing of both of these scientific discourses, the book explores how fictional notions of female musicians diverged from actual trends in music making. This book will be of interest to those studying nineteenth-century literature and music.

Ghost Stories for Darwin Banu Subramaniam, 2014-10-15

In a stimulating interchange between feminist studies and biology, Banu Subramaniam explores how her dissertation on flower color variation in morning glories launched her on an intellectual odyssey that engaged the feminist studies of sciences in the experimental practices of science by tracing the central and critical idea of variation in biology. Subramaniam reveals the histories of eugenics and genetics and their impact on the metaphorical understandings of difference and diversity that permeate common understandings of differences among people. Existing in contexts that seem distant from the so-called objective hard sciences, journeying into interdisciplinary areas that range from the social history of plants to speculative fiction, Subramaniam uncovers key relationships between the life sciences, women's studies, evolutionary and invasive biology, and the history of ecology and how ideas of diversity and difference emerged and persist in each field.
