Program with Great Literature and Activities Liz Knowles, Martha Smith, 2018-06-01 You've created a STEAM program in your library but how do you work literacy into the curriculum? With this collection of resource recommendations, direction for program development, and activities, you'll have students reading proficiently in no time. Many schools and libraries are implementing STEAM programs in the school library makerspace to promote problem solving by allowing students to create their own solutions to a problem through trial and error. In order to enhance literacy development in the STEAM program, however, they need resources for integrating literature into the curriculum. In this collection of resources for doing just that, veteran education professionals and practiced coauthors Liz Knowles and Martha Smith bring readers over eight hundred recommended and annotated books and web resources selected based on research on successfully integrating STEAM and literacy programs and organized by the five STEAM areas. Titles are complemented by discussion questions and problem solving activities that will aid educators in both adding and using the best literature to their STEAM programs for encouraging learning. In addition to promoting literacy, these resources will help to develop creativity, lateral thinking skills, and confidence in students.

STEM Baby: Science Dana Goldberg, 2022-06-28 Babies and toddlers are natural born scientists. Whether rolling a ball down a slope, stacking blocks, and knocking them over, placing toys in a container, grouping, and matching objects into categories, stacking rings according to size, stringing large beads, or throwing their stuffies, STEM Babies are always experimenting with something new. This adorable board book introduces little scientists to the foundations of science and encourages young ones to play and be curious about the world around them.

Psychoanalytically Informed Play Therapy Jason L. Steadman, 2024-03-29 Psychoanalytically Informed Play Therapy: Fantasy, Exposure, Life Narrative Therapy is a structured manual for the execution of FELT, an integrative play therapy that marries the analytic, relational, and psychodynamic aspects of traditional Play Therapy with the scientific rigor and replicability standards of clinical empiricism. Jason Steadman's FELT model creates a structured, empirically derived means of monitoring children's play using psychoanalytic methods. Steadman's method proposes the usage of story stems to structure play to address critical needs in children's psychological development. In FELT, Steadman teaches readers how to identify problematic play themes and how to respond therapeutically to drive play and general child development toward healthy directions. Steadman uses anxiety as the primary example of psychological distress for FELT but also shows how the method can be applied to many other pathologies such as depression and trauma. Steadman explains 11 core FELT themes, which are then further condensed to three major clinical targets identified in the play of clinically anxious children. Each of these is described in detail in the book, and therapists are shown not only how to reliably identify themes but how to focus their interventions to move children toward major play-based targets. Integrating psychoanalytic theory with an emphasis on Object Relations, Steadman's FELT program highlights the importance of the self in healthy child development and how play-based psychotherapy can be used to help children build stronger, healthier selves that can face a wide variety of psychological issues across their lifespan.

Including comprehensive theoretical underpinnings and thorough clinical examples of FELT at work this volume will allow therapists clinicians and mental health workers to understand childhood play in an empirically based manner and show them how to integrate the key tenets of FELT into their own work to better aid children experiencing anxiety and other mental health concerns
