Unscientific America:

Unscientific America Chris Mooney, Sheril Kirshenbaum, 2009-07-14 In his famous 1959 Rede lecture at Cambridge University the scientifically trained novelist C P Snow described science and the humanities as two cultures separated by a gulf of mutual incomprehension And the humanists had all the cultural power the low prestige of science Snow argued left Western leaders too little educated in scientific subjects that were increasingly central to world problems the elementary physics behind nuclear weapons for instance or the basics of plant science needed to feed the world s growing population Now Chris Mooney and Sheril Kirshenbaum a journalist scientist team offer an updated two cultures polemic for America in the 21st century Just as in Snow s time some of our gravest challenges climate change the energy crisis national economic competitiveness and gravest threats global pandemics nuclear proliferation have fundamentally scientific underpinnings Yet we still live in a culture that rarely takes science seriously or has it on the radar For every five hours of cable news less than a minute is devoted to science 46 percent of Americans reject evolution and think the Earth is less than 10 000 years old the number of newspapers with weekly science sections has shrunk by two thirds over the past several decades The public is polarized over climate change an issue where political party affiliation determines one s view of reality and in dangerous retreat from childhood vaccinations Meanwhile only 18 percent of Americans have even met a scientist to begin with more than half can t name a living scientist role model For this dismaying situation Mooney and Kirshenbaum don t let anyone off the hook They highlight the anti intellectual tendencies of the American public and particularly the politicians and journalists who are supposed to serve it but also challenge the scientists themselves who despite the best of intentions have often failed to communicate about their work effectively to a broad public and so have ceded their critical place in the public sphere to religious and commercial propagandists A plea for enhanced scientific literacy *Unscientific America* urges those who care about the place of science in our society to take unprecedented action We must begin to train a small army of ambassadors who can translate science s message and make it relevant to the media to politicians and to the public in the broadest sense An impassioned call to arms worthy of Snow s original manifesto this book lays the groundwork for reintegrating science into the public discourse before it s too late

Unscientific America Chris Mooney, Sheril Kirshenbaum, 2010-05 Climate change the energy crisis nuclear proliferation many of the most urgent problems of the twenty first century require scientific solutions yet America is paying less and less attention to scientists For every five hours of cable news

Unscientific America: 9/11, Harris and Chomsky Anab Whitehouse, 2018-11-06 This book serves as a concise and incisive introduction into various aspects of the 9 11 issue and does so in a unique fashion Among other things it gives expression to an overview of the transformation that took place in the understanding of Peter Michael Ketchum a former employee of NIST with respect to the issue of 9 11 and the book also pursues a fairly extensive round of critical reflection in relation to the rather disturbing views of Sam Harris and Noam Chomsky on matters pertaining to 9 11 More specifically despite the fact that both Dr Harris and

Professor Chomsky are considered at least by some people to be scientists nonetheless rather surprisingly if not shockingly in the matter of 9 11 neither of the foregoing two gentlemen seems to exhibit the basic qualities one might expect from a scientist namely curiosity rigor insight methodology attention to detail concern for the quality of evidence logical analysis or the capacity to ask probing questions but instead they appear to be preoccupied with manufactured conspiracies of one kind or another This book Unscientific America 9 11 Harris and Chomsky will present a substantial amount of evidence to demonstrate that in the matter of 9 11 neither Dr Harris nor Professor Chomsky appears to know all that much about the actual facts of 9 11 Yet such a lack of knowledge has not prevented either of those two individuals from making all manner of allegations concerning the events of that tragic day that seem to be unsubstantiated In the matter of 9 11 both Dr Harris and Professor Chomsky behave in a way that suggests that they each in his own inimitable style appear to have become deeply entangled in a process of willful blindness in which they could have known relevant facts concerning 9 11 and should have known those facts but instead seem to have taken active steps to ignore such information and as a result bear a certain amount of responsibility for the ensuing tragedies that might have been prevented or lessened to some degree if Dr Harris and Professor Chomsky had been less cavalier in their mishandling of the actual evidence of 9 11 and in the process appear to have misled millions of other individuals concerning the facts of that occasion

America Through the Eyes of China and India Edward D. Sherman,2010-09-09 America has long exported its network and cable programming abroad but with a changing world comes a changing dynamic As global centers of power shift and wealth becomes redistributed and perhaps even re centered vast audiences which have never before had contact with American television will begin to gain access to the full wealth and abundance of American programming The opening of new markets and new audiences particularly within the growing superpowers of China and India presents us with a novel situation It is one thing for a show like The OC to be played in a nation like England where the cultural and religious differences with the United States are not that profound and quite another for it to air in a nation like India where arranged marriages the caste system and pervasive poverty are still everyday realities America Through the Eyes of China and India explores the dynamics of television identity and cultural communication providing a new lens for encountering interpreting and judging American culture and the American identity

Framing 9/11, 3rd Edition Anab Whitehouse,2018-11-06 One of the readers of the

first edition of this book considered it to be the best work that has been written on the subject of 9 11 The 3rd edition seeks to make a very good book even better Framing 9 11 3rd Edition contains all of the material that was present in the first two editions This includes critical discussions on The collapse of Building 7 the no planes issue controlled demolition the work of Dr Judy Wood commentary on the views of Bill Maher and Matt Taibi concerning 9 11 Conspiracy and other C words as well as a series of Did You Know features The current updated edition of Framing 9 11 involves more than 150 pages of new material and much of this is contained in chapter of this book entitled Unscientific America 9 11 Sam Harris and Noam Chomsky The penultimate chapter of this book also contains new material It consists of an overview of and introduction to the work of Rebekah Roth which is given expression in her Methodical trilogy as well as through a variety of interviews The final chapter of the 3rd Edition gives expression to an exploration of The 9 11 Delusion and Its Consequences This discussion will critically examine the etiology of our current dilemma and provide an outline concerning how the very first step taken toward the pathology in which we are mired today began when Americans both leaders and ordinary citizens ceded their moral and intellectual agency to something other than the truth and in the process became vulnerable to the 9 11 delusion By becoming entangled in that delusion all too many people were prepared to commit crimes against peace i e unprovoked aggression against other people and nations which in turn led to war crimes and crimes against humanity However our nightmare began when people both leaders and ordinary citizens denied themselves and others the opportunity a to establish the truth about among other things 9 11 and b to use that truth to work to create conditions that are conducive to the realization of inalienable sovereignty for everyone

The Educated Eye Nancy A. Anderson,2012 The creation and processing of visual representations in the life sciences is a critical but often overlooked aspect of scientific pedagogy The Educated Eye follows the nineteenth century embrace of the visible in new spectatoria or demonstration halls through the twentieth century cinematic explorations of microscopic realms and simulations of surgery in virtual reality With essays on Doc Edgerton s stroboscopic techniques that froze time and Eames s visualization of scale in Powers of Ten among others contributors ask how we are taught to see the unseen

Educational Horizons Anab Whitehouse,2018-11-06 Educational Horizons explores the nature of the relationship between education and the reality problem from a variety of perspectives In the process of doing so a variety of topics that shape orient and influence the manner in which education is understood and applied are engaged through critical reflection Some of the topics explored during this process of critical reflection are The life and ideas of John Holt cognitive development human nature the construction of social reality reason several landmark court cases involving the evolution v creationism debate Noam Chomsky Sam Harris propaganda sovereignty qualities of a teacher epistemology hermeneutical field theory as well as some rather revolutionary ideas concerning education and the Constitution
