Nineteenth-Century Ireland Matthew Kelly,2019-11-05 The environmental humanities are one of the most exciting and

rapidly expanding areas of interdisciplinary study and this collection of essays is a pioneering attempt to apply these approaches to the study of nineteenth century Ireland By bringing together historians geographers and literary scholars the volume offers new and original insights into familiar topics Fate of the Flesh Daniel Juan Gil,2021-01-05 In the seventeenth century the ancient hope for the physical resurrection of the body and its flesh began an unexpected second life as critical theory challenging the notion of an autonomous self and driving early modern avant garde poetry As an emerging empirical scientific world view and a rising Cartesian dualist ontology transformed the ancient hope for the resurrection of the flesh into the fantasy of a soul or mind living on separately from any body literature complicated the terms of the debate Such poets as Donne Herbert Vaughan and Jonson picked up the discarded idea of the resurrection of the flesh and bent it from an apocalyptic future into the here and now to imagine the self already infused with the strange vibrant materiality of the resurrection body Fate of the Flesh explores what happens when seventeenth century poets posit a resurrection body within the historical person These poets see the resurrection body as the precondition for the social person s identities and forms of agency and yet as deeply other to all such identities and agencies an alien within the self that both enables and undercuts life as a social person This perspective leads seventeenth century poets to a compelling awareness of the unsettling materiality within the heart of the self and allows them to re imagine agency selfhood and the natural world in its light By developing a poetics that seeks a deranging materiality within the self these poets anticipate twentieth century avant garde poetics They frame their poems neither as simple representation nor as beautiful objects but as a form of social praxis that creates new communities of readers and writers assembled around a new experience of self as body mediated by poetry

Robert Hollinger,1994-08-04 The major themes of postmodernist writing are demystified in this introductory text Robert Hollinger reviews key postmodern discussions on critical topics such as values identity and the self and society He compares postmodern thinking with that of the enlightenment project modernism modernity Marxism and Critical Theory This together with his treatment of Foucault Lyotard Baudrillard Derrida Deleuze Guattari and other leading postmodern theorists provides an excellent introduction to modern social theory **The Journal of Philosophy** ,1988 **The Augustinian Imperative**
William E. Connolly,1993-02-16 The Augustinian Imperative which insists there is an intrinsic moral order susceptible to authoritative representation is particularly imprinted on the political culture of contemporary America In this new interpretation of one of the most important figures in political thought the author approaches the study of the Augustinian Imperative from a critical distance from a post Nietzschean perspective that seeks to assess and modify effects of the Augustinian legacy on the present *The Politics of Nature* John M. Meyer,1997 **Social Theory and Practice** ,1994
Political Theory and Modernity William E. Connolly,1993 Modernity is marked by acrimonious debate over the form of the good society and the proper shape of politics But these struggles are set within a frame that supports some arguments and rules other possibilities out of contention If late modernity is a time of danger as well as significant achievement it is necessary to ask how can we become more reflective about the economies of thought that have governed modern political discourse William Connolly clarifies the affinities binding together disparate theorists who have sought to comprehend the shape and prospects of modernity He reveals how thinkers adamantly opposed to one another at one level implicitly share assumptions and demands at a more basic level and invites Nietzsche the thinker who disturbs modern theories by assessing them from the hypothetical perspective of a non modern future to expose patterns of insistence inside the theories of his predecessors **Private Rights in Public Resources** Leigh Stafford Raymond,2000 Rights, Laws, and Infallibility in Medieval Thought Brian Tierney,1997 The papers collected in this volume fall into three main groups Those in the first group are concerned with the origin and early development of the idea of natural rights The author argues here that the idea first grew into existence in the writings of the 12th century canonists The articles in the second group discuss miscellaneous aspects of medieval law and political thought They include an overview of modern work on late medieval canon law The final group of articles is concerned with the history of papal infallibility with especial reference to the tradition of Franciscan ecclesiology and the contributions of John Peter Olivi and William of Ockham Beacham's Guide to Environmental Issues & Sources Walton Beacham,1993
