## **War And Anti War Making Sense Of Today's Global Chaos:**

*War and Anti-war* Alvin Toffler, Heidi Toffler, 1995 Two of the world's leading futurists turn to a subject that has always haunted man. By analysing past wars they offer insights into today's military conflicts and an eye-opening portrait of the future face of battle

**War and Anti-War** Alvin Toffler, Heidi Toffler, 1995-05

**Military Logistics and Strategic Performance** Thomas M. Kane, 2012-07-26 This work argues that logistics in warfare is crucial to achieving strategic success. The author identifies logistical capabilities as an arbiter of opportunity which plays a critical role in determining which side will hold the strategic initiative in war. Armies which have secured reliable resources of supply have a great advantage in determining the time and manner in which engagements take place. Often they can fight in ways their opponents cannot. The author illustrates this point with case studies of British logistics during the Burma campaign in the World War II, American logistical innovations during the Pacific War, Communist supply methods during the American phase of the Vietnam War and the competing logistical systems of both NATO and Warsaw Pact conventional forces during the Cold War

*The Ashgate Research Companion to Modern Warfare* George Kassimeris, John D. Buckley, 2010 This research collection provides a comprehensive study of important strategic, cultural, ethical and philosophical aspects of modern warfare. It offers a refreshing analysis of key issues in modern warfare not only in terms of the conduct of war and the wider complexities and ramifications of modern conflict but also concepts of war, the crucial shifts in the structure of warfare and the morality and legality of the use of force in a post 9/11 age

*Professional Journal of the United States Army*, 2004

**Providing for National Security** Andrew M. Dorman, Joyce P. Kaufman, 2014-04-30 *Providing for National Security: A Comparative Analysis* argues that the provision of national security has changed in the 21st century as a result of a variety of different pressures and threats. In this timely volume experts from both the academic and policy worlds present 13 different country case studies drawn from across the globe including established and newer states, large and smaller states, those on the rise and those in apparent decline to identify what these key players consider to be their national security priorities, how they go about providing national security, how they manage national security and what role they see for their armed forces now and in the future. The book concludes that relative standing and the balance of power remains important to each state and that all see an important role for armed forces in the future

*Military Review*, 2004

*Clausewitz and Chaos* Stephen J. Cimbala, 2001 Failure and folly are inevitable in war and in security policy related to war. Technology cannot rescue flawed policy or strategy. In his review of U.S. military strategy Cimbala points to the possibility that excessive faith in technology may lead American strategy into a cul de sac

*Quarterly Review of Military Literature*, 1998

**Democracy, Pluralism, and Change** Sanjaya Serchan, 2001

*War Studies Journal*, 1997

**Proceedings of the ... Annual Conference** Pennsylvania Association of Two-Year Colleges, 1996

*Naval War College Review*, 2003

*Global Meltdown* Joseph Wayne Smith, Graham Lyons, Evonne Moore, 1998-04-30 The modern world is in the author's view

undergoing the process of meltdown global meltdown Having argued in an earlier book that humankind is headed for an environmental catastrophe that will either eliminate the human species or greatly reduce our numbers the authors now focus on the breakdown of organized social order that will occur when the ecological crisis happens Believing that civilization as we know it will not last even without a definitive environmental cataclysm they explore here the social political and philosophical ramifications of this vision After outlining the interaction of the forces of environmental destruction economic rationalism and technological revolution this book shows their impact on social problems such as immigration racial and ethnic conflict and the loss of personal spiritual and religious meaning In the first chapter the authors consider the effects of these social conflicts in both the non Western and the Western world concluding that the global meltdown theory is supported by the worldwide rise of terrorism Chapter 2 discusses the technological and ecological forces they believe will lead to a new world disorder The work then goes on to use Australia as a case study illustrating the collision of population and environment In the concluding chapter the authors support their thesis further with a review of the literature on the subject

**Russia and Armed Persuasion** Stephen J. Cimbala, 2001 In *Russia and Armed Persuasion* Stephen J Cimbala argues that Russia's war planners and political leaders must make painful adjustments in their thinking about the relationship between military art and policy in the twenty first century Russia must master the use of force for persuasion not just destruction As the author shows military persuasion requires that Russian leaders master the politico military complexity of crisis management deterrence and arms control and the limitation of ends and means in war Russia now has scarce resources to devote to defense and can no longer afford the stick only diplomacy and strategy that have characterized some of its recent past Russian and Soviet military thinking historically emphasized the blunderbuss and total war overwhelming mass firepower and conflicts of annihilation or prolonged attrition However historical experience also forced Russia and the Soviet Union to come to grips with crisis management and with limited aims and means in the conduct of war On the one hand Russia failed the test of military persuasion in its management of the July 1914 crisis that plunged Europe into World War I On the other hand the Soviet Union did adjust to the requirements of the nuclear age for crisis management deterrence and limited war Using this mixed record of Russian and Soviet success and failure in twentieth century experience Cimbala argues that Russia can and must improve in the twenty first century According to the author the first decades of this century will pose at least three immediate challenges to Russia's military persuasion Russia must continue to pursue strategic nuclear arms control and arms reductions with the United States and avoid re starting the Cold War by means of an ill considered race in missile defenses Second Russia must maintain a surer grip on the military information revolution especially as it pertains to the management of Russia's nuclear deterrent Third Russia must develop forces that are more flexible

*Paying the Human Costs of War* Christopher Gelpi, Peter Feaver, Jason Aaron Reifler, 2009 The book finds that the most important consideration for the public is the expectation of success If the public believes that a mission will succeed the

public will support it even if the costs are high When the public does not expect the mission to succeed even small costs will cause the withdrawal of support Providing a wealth of new evidence about American attitudes toward military conflict Paying the Human Costs of War offers insights into a controversial timely and ongoing national discussion *Transnational Crime and Illegal Immigration in the Asia-Pacific Region* John McFarlane,1999 *Effects-based Approaches to Operations* Canada. Department of National Defence,2008 Distributed by the Government of Canada Depository Services Program **Regional Security, International Intervention, NMD System and Its Implications, and Bilateral Relations Between India and Egypt** ,2001 **Hunger 2001** Bread for the World Institute,2001
