Want Not:

Waste Not Want Not Robert Allen, 2013-11-05 No one wants toxic waste dumped in their back yard Dioxins and furans from incinerators dangerous chemicals leaching from landfill sites and the apparently random dumping of nuclear waste are all clear threats to our health and lives In fact any waste not properly dealt with can become dangerous yet industry and state seem to collude recklessly in its production Robert Allen describes the waste produced in Britain and Ireland and the woefully inadequate means of dealing with it He looks too at governmental intransigence and dishonesty and at industry s refusal to consider the needs of local communities He also gives an account of the available legislation governing toxic waste and the degree to which it will need radical change in the face of a rapidly growing problem Waste dumping impinges on people s lives and he examines some of the very successful campaigns against the many ill considered dumping grounds As governments only respond to pressure there are valuable lessons to be learnt from these campaigns This book sets out the nature of the problem and provides a basis on which to tackle it Originally published in 1992 *Performing a Christian Life* Thomas D. Kennedy, 2019-11-13 We want to live good lives but determining what a good life is isn t easy especially if we want the lives we lead to be ours rather than somebody else s Tom Kennedy helps us see why it is hard to find our way when it comes to living well and what we can do about that Finding our way requires knowing who we are understanding ourselves and Christians because of their experience with God will understand themselves differently than others in at least some ways Kennedy explores that understanding and discovers that Christian encounters with God lead to beliefs about God human nature forgiveness values and loving well that have important implications for what we do and feel for how we should live In clear and familiar language and with probing questions he helps us think more carefully and deeply about our identities and what it should look like for us to live well *Technology and the Overturning of Human Autonomy* Simona Chiodo, 2023-04-26 This book offers an extensive historical philosophical and ethical discussion on the role of autonomous technologies and their influence on human identity By connecting those different perspectives and analysing some practical case studies it guides readers to dissect the relationship between machine and human autonomy and machine and human identity It analyses how the relationship between human and technology has been evolving in the last few centuries Last it aims at proposing an explanation on the reasons why humans have been keen on developing their own autonomy s perfect avatar *Asymmetric Events* Barbara Lewandowska-Tomaszczyk, 2008 The book introduces the concept of asymmetric events an important concept in language and cognition which for the first time in linguistic literature is identified in a more systematic way and analyzed in a number of different languages including typologically or genetically unrelated ones Asymmetric events are two or more events of unequal status in an utterance and papers in the volume present ways in which a linguistic description of main events in a sentence is different morphologically syntactically discursively from a description of backgrounded events The prototypical asymmetries involving perception cognition and language are identified in

subordination nominalization and modification of various kinds but they extend to coordinate structures serial verbs spatial language and viewing arrangement as well as part whole relations The perspective is broadly cognitive and functional the authors use different though complementing methodologies some include corpus data and the asymmetries are shown to have a variety of stylistic and ideological implications An in depth analysis of manifold asymmetries in structure and function of diverse languages makes this volume of interest to linguists of different persuasion philosophers cognitive researchers discourse analysts and students of language and cognition

The Works of Aurelius Augustine: Writings in connection with the Manichaeian heresy, translated by Richard Stothert. 1872 Saint Augustine (of Hippo),1872 **Political** Robert Green Ingersoll,1900 **The Sunday-school World** ,1900 **The English Illustrated Magazine** ,1891 What in God's Name Are You Eating Andrew Francis,2015-02-26 How you eat affects the planet and everyone else on it What you eat might literally cost the earth It also has implications for your health for the grower or producer and for the way you think about the world What in God s Name Are You Eating faces what many of us choose to ignore in the Western world we as adults have allowed a childlike innocence to mask the real cost of the environment in which we are cocooned while thousands elsewhere find themselves drought stricken and starving What in God s name are they not eating Enough is the simple answer and we are part of the reason why The price of life as we know it is high To those of us who have life there is a moral imperative to enable others to share it rather than suppress them With its advocacy of a globally responsibly discipleship What in God s Name Are You Eating enables us to see how the world s peoples can have life and a long future While the reflection is rooted in radical Mennonite Christianity the challenge is to those of faith and those of none
