forces be defined as guardians of a regime in a democratic state How is it possible to limit the power of armies to solely military prerogatives and competences How can the intervention of military forces in the political arena in democratising countries be prevented It is easy to ask these questions but finding answers is more difficult Using historical events and theories as examples to follow is an even more complicated task What happened after the Arab Spring has demonstrated again how civil military relations constitute an important pillar of the democratisation process The contributors to this book develop and analyse the reasons why militaries in the Middle East and the Mediterranean wished to obtain a guardianship role and the methods they used to achieve and maintain it The book also investigates how these militaries reacted to democratisation in their respective countries and begins with a conceptual framework followed by examples from Spain Egypt Turkey Lebanon and Iran This work provides a multi faceted understanding of the historical political social and economic layers of complicated civil military relations in one of the world s most unstable regions
