Statistical Inference in Stochastic Processes Ishwar V. Basawa,Narahari Umanath Prabhu,1994 *Statistical Inference from Stochastic Processes* Narahari Umanath Prabhu,1988 Comprises the proceedings of the AMS IMS SIAM Summer Research Conference on Statistical Inference from Stochastic Processes held at Cornell University in August 1987 This book provides students and researchers with a familiarity with the foundations of inference from stochastic processes and intends to provide a knowledge of the developments **Statistical Inferences for Stochasic Processes** Ishwar V. Stochastic Processes and Statistical Inference B. L. S. Prakasa Rao,B. Ramdas Bhat,1996 **A Course in Stochastic Processes** Denis Bosq,Hung T. Nguyen,2013-03-09 This text is an Elementary Introduction to Stochastic Processes in discrete and continuous time with an initiation of the statistical inference The material is standard and classical for a first course in Stochastic Processes at the senior graduate level lessons 1 12 To provide students with a view of statistics of stochastic processes three lessons 13 15 were added These lessons can be either optional or serve as an introduction to statistical inference with dependent observations Several points of this text need to be elaborated 1 The pedagogy is somewhat obvious Since this text is designed for a one semester course each lesson can be covered in one week or so Having in mind a mixed audience of students from different departments Math ematics Statistics Economics Engineering etc we have presented the material in each lesson in the most simple way with emphasis on moti vation of concepts aspects of applications and computational procedures Basically we try to explain to beginners questions such as What is the topic in this lesson Why this topic How to study this topic math ematically The exercises at the end of each lesson will deepen the stu dents understanding of the material and test their ability to carry out basic computations Exercises with an asterisk are optional difficult and might not be suitable for homework but should provide food for thought *Statistical Inference for Discrete Time Stochastic Processes* M. B. Rajarshi,2012-10-05 This work is an overview of statistical inference in stationary discrete time stochastic processes Results in the last fifteen years particularly on non Gaussian sequences and semi parametric and non parametric analysis have been reviewed The first chapter gives a background of results on martingales and strong mixing sequences which enable us to generate various classes of CAN estimators in the case of dependent observations Topics discussed include inference in Markov chains and extension of Markov chains such as Raftery s Mixture Transition Density model and Hidden Markov chains and extensions of ARMA models with a Binomial Poisson

Geometric Exponential Gamma Weibull Lognormal Inverse Gaussian and Cauchy as stationary distributions It further discusses applications of semi parametric methods of estimation such as conditional least squares and estimating functions in stochastic models Construction of confidence intervals based on estimating functions is discussed in some detail Kernel based estimation of joint density and conditional expectation are also discussed Bootstrap and other resampling procedures for dependent sequences such as Markov chains Markov sequences linear auto regressive moving average sequences block based bootstrap for stationary sequences and other block based procedures are also discussed in some detail This work can be useful for researchers interested in knowing developments in inference in discrete time stochastic processes It can be used as a material for advanced level research students *Another Look at Statistical Inference for Stochastic Processes* P.
