Garrett, 1967      Visual Literacy Judith Wilde, Richard Wilde, 1991 Nineteen challenging assignments and over one thousand pieces of solution art executed by the author's students are presented Each visual problem shows the actual assignment sheet given to the students and includes an analysis of the problem's underlying intent addressing principles such as formal reference negative positive relationships cropping techniques and other important issues      *Drawn to Design* Eric Jenkins, 2022-04-19 The book is a guide for students and teachers to understand the need for the role of and the methods and techniques of freehand analytical sketching in architecture The presentation focuses on drawing as an approach to and phase of architectural design The conceptual goal of this approach is to use drawing not as illustration or depiction but as exploration The first part of the book discusses underlying concepts of freehand sketching in design education and practice as a complement to digital technologies The main component is a series of chapters that constitute a typology of fundamental issues in architecture and urban design for instance issues of facade are illustrated with sketch diagrams that show how facades can be explored and sketched through a series of specific questions and step by step procedures In the expanded and updated edition a new part explores the questions and experiences of large architectural offices in applying freehand drawing in the practice of architectural design This book is especially timely in an age in which the false conflict between traditional vs digital gives way to multiple design tools including sketching It fosters understanding of the essential human ability to investigate the designed and the natural world through freehand drawing      **Computer Support Collaborative Learning Practices** Claire O'Malley, 2009-01-01      **Art Subjects** Howard Singerman, 2023-09-01 Nearly every artist under the age of fifty in the United States today has a Master of Fine Arts degree Howard Singerman's thoughtful study is the first to place that degree in its proper historical framework and ideological context Arguing that where artists are trained makes a difference in the forms and meanings they produce he shows how the university with its disciplined organization of knowledge and demand for language played a critical role in the production of modernism in the visual arts Now it is shaping what we call postmodernism like postmodernist art the graduate university stresses theory and research over manual skills and traditional techniques of representation Singerman who holds an M F A in sculpture as well as a Ph D in Visual and Cultural Studies is interested in the question of the artist as a professional and what that word means for and about the

fashioning of artists He begins by examining the first campus based art schools in the 1870s and goes on to consider the structuring role of women art educators and women students the shift from the fine arts to the visual arts the fundamental grammar of art laid down in the schoolroom and the development of professional art training in the American university Singerman s book reveals the ways we have conceived of art in the past hundred years and have institutionalized that conception as atelier activity as craft and finally as theory and performance Nearly every artist under the age of fifty in the United States today has a Master of Fine Arts degree Howard Singerman s thoughtful study is the first to place that degree in its proper historical framework and ideological context Arguing that where ar
