Centering Humanism in STEM Education Bryan Dewsbury, Susannah McGowan, Sheila S. Jaswal, Desiree Forsythe, 2024-09-24 Research demonstrates that STEM disciplines perpetuate a history of exclusion particularly for students with marginalized identities This poses problems particularly when science permeates every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital We must create a STEM environment in which students with marginalized identities feel respected listened to and valued We must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of STEM

Treating Functional Abdominal Pain in Children Nancy L. Zucker, Katharine L. Loeb, Martha E. Gagliano, 2023-11-30 This playful and practical handbook presents one of the first clinically tested treatment protocols for Functional Abdominal Pain (FAP) in young children. Created and tested by Dr. Nancy Zucker with support from the National Institutes of Health, this intervention teaches children to become FBI agents: Feeling and Body Investigators, detectives who investigate and learn to manage their symptoms. Kids develop a newfound trust in their bodies by using strategies that transform fear and confusion into curiosity and humor. This clinical manual provides a detailed step-by-step guide to treatment, including session plans, worksheets, and activities, and is supplemented by diagrams, excerpts from case dialogues, references, and cartoons. Downloadable full-color materials are available online to print and use in individual or group sessions. Offering an effective and fun approach firmly rooted in science, this manual guides clinicians in implementing FBI in their own practices, enabling more children to access this novel treatment.
