Sterling Dollar Diplomacy In Current Perspective:

Sterling-Dollar Diplomacy in Current Perspective Richard N. Gardner, 1980 Investigates the creation of international economic policy with special emphasis on the interaction between official policy and public opinion *Sterling-dollar Diplomacy in Current Perspective* Richard N. GARDNER, 1956 , **The United States and European Reconstruction 1945-1960** John Killick, 2014-06-11 In this book John Killick introduces the reader to a key aspect of economic history the impact of American economic intervention in Europe after World War II The effects of this impact are still open to debate The Marshall Plan has traditionally been seen as a decisive turning point in European economic and political history but its effect is now being called into question Would Europe have revived spontaneously after 1945 Did American dollars save the world in 1947 Was American influence the underlying reason for the general drift away from socialism and the move towards European federalism in the late 1940s and early 1950s If the Marshall Plan in conjunction with NATO created a coherent and prosperous western bloc was this critical for the outcome of the Cold War These are important questions to which this careful analysis provides some new and accessible answers **180 Day Access Global Political Economy** Erin Hannah, What constitutes Global Political Economy In whose interest is GPE constructed and by whom How can injustices in GPE best be redressed These are some of the key questions addressed in the 7th edition of this highly regarded highly regarded textbook As an ever evolving field subject to constant changes and developments the new edition provides a comprehensive introduction to the subject written by leading experts in the field Edited by Dr Erin Hannah the 7th edition surveys major contemporary issues and debates in GPE while being attuned to the silences marginalizations and exclusions that predominate the field By integrating a wide range of theoretical approaches rich empirical material non western viewpoints and diversity of contributors the 7th edition provides enhanced coverage of the central axes of inequality in GPE and centers topics such as colonialism race gender North South divides and everyday life Orderly Change David M. Andrews, 2011-03-15 The Bretton Woods Conference of 1944 resulted in the formation of the International Monetary Fund and World Bank and helped lay the foundation for an unprecedented expansion of international commerce Yet six decades later at the beginning of the twenty first century the central characteristics of the Bretton Woods system remain disputed and the subject of continuing public policy debate Relying on extensive access to IMF World Bank and other archives the authors show that the history of international monetary relations since Bretton Woods is one of orderly change that is change within a sturdy but supple framework Even during the years of fixed exchange rates very different practices characterized international monetary relations immediately after World War II during the 1950s and during the 1960s Later when the fixed exchange rate system collapsed underlying commitments to trade liberalization in the context of continuing national economic policy autonomy survived and even flourished However the resulting international economic order is now in grave danger the tension between states autonomy and their mutual openness has become acute as international monetary

structures no longer appear capable of mediating between these objectives David M Andrews and the contributors to *Orderly Change* examine past transitions as a means of suggesting possible avenues for current and future policymaking

Failed Imagination? Andrew J. Williams, 1998 Francisco Gomez de Sandoval Duke of Lerma 1553-1625 is the last major unknown statesman in modern European history Patrick Williams brings him dramatically to life and challenges the assumptions that historians have made about him and about Spanish history at a time of profound crisis inviting a re-evaluation of the phenomenon of government by favourites in this seminal period of European history Lerma served Philip III as his favourite and first minister between 1598 and 1618 His power dazzled contemporaries one petitioner telling Philip that he had come to see him because I could not get an appointment with the Duke of Lerma Within a decade of assuming office Lerma had raised his family from humiliating poverty to great riches and was the greatest patron of the arts in Europe His use of power provoked intense debate about the nature of corruption in government Yet Lerma remained deeply ambivalent about his position Determined to follow family tradition and retire into religious life to secure the salvation of his soul he secured a cardinalate in 1617 ending his life as a prince of the Church

Britain's Sterling Colonial Policy and Decolonization, 1939-1958 Allister Hinds, 2001-07-30 Examining the impact of Britain's sterling policy on its colonial economic policy Hinds argues that Britain extricated itself from colonial demands for development finance by transferring power to colonial peoples

Domestic Choices, International Markets Andrew Carl Sobel, 1994-10-13 The internationalization of financial markets moved to center stage in the international political economy during the 1980s These markets affect trade investment venture enterprises growth and competitiveness Domestic Choices International Markets uses the internationalization and liberalization of securities markets to examine interdependence leadership and the mechanisms of change in an increasingly global political economy During the 1970s and 1980s the United States began relaxing government oversight of the security markets promoting price competition lowering national barriers dismantling barriers between individual sectors of the financial industry encouraging innovation and easing international capital flows The United Kingdom and Japan soon adopted similar policies thereby transforming markets in New York London and Tokyo Yet during this time the United States leadership in international finance was seen to be waning Why did Japan and the United Kingdom follow the United States lead so completely and quickly Most emphasize the interdependence of the world's financial markets to explain this phenomenon If this were the case though one would expect regulation and transaction costs to converge across markets by competitive deregulation This has not happened Significantly the markets have remained overwhelmingly national with only a modest increase in international activity In an alternate explanation Andrew Sobel argues that opening up national doors

was really a secondary consequence of policy competitions among sectors of the domestic financial services industry Changes that occurred earlier in the United States served as examples and constrained the range of choices considered by policy makers in other nations The author shows how information and reputation networks award disproportionate influence to U S actors and institutions Thus U S leadership persists

The World Today ,1985 The Long Twentieth Century Giovanni Arrighi,1994 Winner of the American Sociological Association PEWS Award 1995 for Distinguished Scholarship The Long Twentieth Century traces the epochal shifts in the relationship between capital accumulation and state formation over a 700 year period Giovanni Arrighi masterfully synthesizes social theory comparative history and historical narrative in this account of the structures and agencies which have shaped the course of world history over the millennium Borrowing from Braudel Arrighi argues that the history of capitalism has unfolded as a succession of long centuries ages during which a hegemonic power deploying a novel combination of economic and political networks secured control over an expanding world economic space The modest beginnings rise and violent unravel ing of the links forged between capital state power and geopolitics by hegemonic classes and states are explored with dramatic intensity From this perspective Arrighi explains the changing fortunes of Florentine Venetian Genoese Dutch English and finally American capitalism The book concludes with an examination of the forces which have shaped and are now poised to undermine America s world power

Rebuilding Devastated Economies in the Middle East Leonard Binder,2007-10-15 This book analyzes the political obstacles to the adoption of classic strategies of economic recovery and development as well as the economic consequences of democratic political reforms The case studies demonstrate that both rentierism and the democracy deficit result from a means end problem rather than an ideological problem The contributors focus on the role of the challenged rulers of shaky states where economic devastation has been the consequence of civil strife often aided and abetted by external influences But if there can be no successful rebuilding of devastated economies without some significant regime change we seem to be asking these governments to put themselves out of business
