Sarat,Lawrence Douglas,Martha Merrill Umphrey,2014-01-08 *Law and War* explores the cultural historical spatial and theoretical dimensions of the relationship between law and war a connection that has long vexed the jurisprudential imagination Historically the term war crime struck some as redundant and others as oxymoronic redundant because war itself is criminal oxymoronic because war submits to no law More recently the remarkable trend toward the juridification of warfare has emerged as law has sought to stretch its dominion over every aspect of the waging of armed struggle No longer simply a tool for judging battlefield conduct law now seeks to subdue warfare and to enlist it into the service of legal goals Law has emerged as a force that stands over and above war endowed with the power to authorize and restrain to declare and limit to justify and condemn In examining this fraught contested and evolving relationship *Law and War* investigates such questions as What can efforts to subsume war under the logic of law teach us about the aspirations and limits of law How have paradigms of law and war changed as a result of the contact with new forms of struggle How has globalization and continuing practices of occupation reframed the relationship between law and war **Dwight D. Presidents & Their Generals Matthew Moten,2014-11-05 A military historian traces the long struggle of American presidents to assert their power over uncooperative generals Since World War II the United States has been engaged in near constant military conflict abroad often with ill defined objectives ineffectual strategy and uncertain benefits In this era of limited congressional oversight and wars of choice the executive and the armed services have shared the primary responsibility for making war The negotiations between presidents and their generals thus grow ever more significant and understanding them becomes essential Matthew Moten traces a sweeping history of the evolving roles of civilian and military

leaders in conducting war demonstrating how war strategy and national security policy shifted as political and military institutions developed and how they were shaped by leaders personalities Early presidents established the principle of military subordination to civil government and from the Civil War to World War II the president s role as commander in chief solidified with an increasingly professionalized military offering its counsel But General Douglas MacArthur s insubordination to President Harry Truman during the Korean War put political military tensions on public view Subsequent presidents selected generals who would ally themselves with administration priorities Military commanders in Vietnam Iraq and Afghanistan did just that and the results were poorly conceived policy and badly executed strategy The most effective historical collaborations between presidents and their generals were built on mutual respect for military expertise and civilian authority and a willingness to negotiate with candor and competence Upon these foundations future soldiers and statesmen can ensure effective decision making in the event of war and bring us closer to the possibility of peace Praise for Presidents and Their Generals This highly readable book impressive in scope is a major contribution to understanding the important yet often shifting dynamics of civil military relations in the U S past present and future W A Taylor Choice The author s opinions are precise and witty and based on comprehensive knowledge of his subject as he clearly demonstrates how wars are lost by the arrogant and or incompetent A brilliant fascinating picture of how wars badly begun and poorly run can affect an entire country usually at the hands of just a few men Kirkus Reviews starred review *Official Reports of the Debates of the House of Commons of the Dominion of Canada* Canada. House of Commons,1953 [The Cuban Missile Crisis, 1962](#) ,1990 In October 1962 United States spy photos revealed that Russian Intermediate Range Ballistic Missiles were housed at bases in Cuba The standoff that followed the discovery has been acknowledged as the most dangerous U S Soviet crisis of the Cold War This collection presents an integrated and comprehensive documentary record of the United States decision making process during the crisis **An Analysis of Discrepancies in Newspaper Accounts of Selected Speeches of Richard M. Nixon During the 1960 Presidential Campaign** John Wayne Murphy,1962 **The First Modern Campaign** Gary A. Donaldson,2007-06-15 The presidential campaign that pitted Richard M Nixon against John F Kennedy was the most significant political campaign since World War II With Eisenhower s tenure at an end American society broke with the culture of the war years This social shift was reflected in and provoked by new trends in American political life and political campaigning all of which made 1960 a landmark year in American politics In this engaging book Gary A Donaldson tells the story of Kennedy versus Nixon with a sharp eye for the salient political developments and a keen sense of the drama of an election that was unlike any other the nation had experienced The election of 1960 was also an orchestrated political drama organized as a sweeping campaign from coast to coast and staged for a national television audience This made it the first modern campaign in which the television media changed the dynamics of presidential politics and in which photographs charisma and direct appeals to voters counted as they had never done before It was also an

election of intense personal rivalry made all the more spirited by the prejudice against Kennedy's Catholicism and his intention to widen the American political arena. Ideological shifts within the parties as they combined with innovations in campaigning would mark a clear divide in politics as it was practiced and politics as it would have to be practiced in the future. Yet not since Theodore White's journalistic account *The Making of the President* has attention been paid to the full 1960 campaign as it played out in the early primaries and then culminated in the November election. Donaldson shows why the whole political season is critical to understanding American politics today. *The First Modern Campaign* is essential and engaging reading for anyone interested in contemporary politics in the United States. **The Missile Crisis** Elie Abel, 1968. President Kennedy's decisive action during the 1962 nuclear confrontation between Russia and the U.S. over missile sites in Cuba is chronicled in *The Florists' Review* Gilbert Leonard Grant, 1954. Freedom and Crisis: Since 1860 Allen Weinstein, 1974. **The Pentagon and the Presidency** Dale Roy Herspring, 2005. A fascinating account from the military's perspective of the historically tense and at times outright antagonistic relations between senior military leaders and American presidents and their advisors.
