Workers Attitudes To Technology:

Workers' Attitudes and Technology Dorothy Wedderburn, Rosemary Crompton, 1972-07-20 First published in 1922 this volume aimed to contribute to our understanding of the complexities which shape attitudes and behaviour at work Based on material obtained from a survey of workers employed by a single firm who operate production systems as widely as different as continuous flow chemical production and yarn spinning this book highlights features of the production system which are crucial in influencing attitudes and behaviour within the work setting Through a comparison of craftsmen and semi skilled workers it also illustrates the influence of differences of expectations upon work attitudes and behaviour The authors reject any approach which could be called technologically determinist but nonetheless seek to show that a comparative approach to the study of behaviour in organizations may still fruitfully take as its starting point technology and the systems of control which are devised for the planning and execution of the task

Improving Training Effectiveness in Work Organizations J. Kevin Ford, 2014-01-14 This compelling volume presents the work of innovative researchers dealing with current issues in training and training effectiveness in work organizations. Each chapter provides an integrative summary of a research area with the goal of developing a specific research agenda that will not only stimulate thinking in the training field but also direct future research. By concentrating on new ideas and critical methodological and measurement issues rather than summarizing existing literature, the volume offers definitive suggestions for advancing the effectiveness of the training field. Its chapters focus on emerging issues in training that have important implications for improving both training design and efficacy. They discuss various levels of analysis: intra-individual, inter-individual, team, and organizational issues, and the factors relevant to achieving a better understanding of training effectiveness from these different perspectives. This type of coverage provides a theoretically driven, scientist-practitioner orientation to the book.
