Brameller, Ronald Norman Allan, Y. M. Hamam, 1976 Sparsity Coding and Its Applications in Computer Vision Zhaowen E. T. Al WANG, 2015-10-28 This book provides a broader introduction to the theories and applications of sparse coding techniques in computer vision research It introduces sparse coding in the context of representation learning illustrates the fundamental concepts and summarizes the most active research directions A variety of applications of sparse coding are discussed ranging from low level image processing tasks such as super resolution and de blurring to high level semantic understanding tasks such as image recognition clustering and fusion The book is suitable to be used as an introductory overview to this field with its theoretical part being both easy and precious enough for quick understanding It is also of great value to experienced researchers as it offers new perspective to the underlying mechanism of sparse coding and points out potential future directions for different applications *Sparsity Measures and their Signal Processing Applications for Machine Condition Monitoring* Dong Wang, Bingchang Hou, 2025-02-01 *Sparsity Measures and their Signal Processing Applications for Machine Condition Monitoring* presents newly designed sparsity measures and their advanced signal processing technologies for machine condition monitoring and fault diagnosis This book systematically covers new sparsity measures including a quasarithmetic mean ratio framework for fault signatures quantification a generalized Gini index as well as classic sparsity measures based on signal processing technologies and a cycle embedded sparsity measure based on new impulsive mode decomposition technology This book additionally includes a sparsity measure data driven framework based optimized weights spectrum theory and its relevant advanced signal processing technologies Provides the background roadmaps and detailed discussion of newly designed sparsity measures and their advanced signal processing technologies for machine condition monitoring and fault diagnosis Covers new theories advanced technologies and the latest contributions in the field of machine condition monitoring and fault diagnosis Particularly focuses on newly advanced sparsity measures for fault signature quantification classic and advanced sparsity measures based signal processing technologies and sparsity measures using data driven framework based signal processing technologies Provides experimental and real world practical validation cases including newly advanced sparsity measures and their advanced signal processing technologies

Computational Electromagnetics and Its Applications Thomas G. Campbell, Roy A. Nicolaidis, Manuel D. Salas, 1997-09-30 This volume contains the proceedings of the first ICASE LaRC Work shop on Computational Electromagnetics and Its Applications conducted by the Institute for Computer Applications in Science and Engineering and NASA Langley Research Center We had several goals in mind when we decided jointly with the Electromagnetics Research Branch to organize this workshop on Computational Electromagnetics CEM Among our goals were a desire to obtain an

overview of the current state of CEM covering both algorithms and applications and their effect on NASA's activities in this area. In addition, we wanted to provide an attractive setting for computational scientists with expertise in other fields, especially computational fluid dynamics (CFD), to observe the algorithms and tools of CEM at work. Our expectation was that scientists from both fields would discover mutually beneficial interconnections and relationships. Another goal was to learn of progress in solution algorithms for electromagnetic optimization and design problems such as problems that make extensive use of field solvers and computational efficiency is at a premium. To achieve these goals, we assembled the renowned group of speakers from academia and industry whose talks are contained in this volume. The papers are printed in the same order in which the talks were presented at the meeting. The first paper is an overview of work currently being performed in the Electromagnetic Research Branch at the Langley Research Center.

Sparse Matrices and Their Uses IMA Numerical Analysis Group. Conference, Institute of Mathematics and Its Applications, 1981. This volume consists of papers presented at a conference held at the University of Reading from July 9th to July 11th, 1980. The conference was principally expository, discussing the application of sparse matrix techniques and software to various problem areas. Many papers introduced new research areas, so this volume should appeal to sparse matrix researchers, users of sparse matrix technologies, and scientists and engineers who would like to know more about this expanding field.

Comprehensive Chemometrics Steven Brown, Roma Tauler, Beata Walczak, 2020-05-26. *Comprehensive Chemometrics* Second Edition Four Volume Set features expanded and updated coverage along with new content that covers advances in the field since the previous edition published in 2009. Subject of note includes updates in the fields of multidimensional and megavariate data analysis, omics data analysis, big chemical and biochemical data analysis, data fusion, and sparse methods. The book follows a similar structure to the previous edition, using the same section titles to frame articles. Many chapters from the previous edition are updated, but there are also many new chapters on the latest developments. Presents integrated reviews of each chemical and biological method, examining their merits and limitations through practical examples and extensive visuals. Bridges a gap in knowledge covering developments in the field since the first edition published in 2009. Meticulously organized with articles split into 4 sections and 12 sub-sections on key topics to allow students, researchers, and professionals to find relevant information quickly and easily. Written by academics and practitioners from various fields and regions to ensure that the knowledge within is easily understood and applicable to a large audience.
