program to help mental health professionals and adoptive parents promote the educational and social development of internationally adopted children aged 4-8. Recognizing the cultural, emotional, and cognitive needs of children who have experienced a fundamental change in their social situation of development following international adoption, *The SmartStart Toolbox* provides a range of family-based remedial activities which stimulate children's thinking and learning while creating scaffolded attachment opportunities during early interactions with their adoptive families. The volume details the notions of psychological tools (Vygotsky) and mediated learning experience (Feuerstein) which form the theoretical foundations for *The SmartStart Toolbox* and offers step-by-step guidance on conducting activities and adapting them to the individual child. The SmartStart methodology can also be used by professionals for diagnostic purposes. This text will benefit researchers in child psychology as well as clinicians, family therapists, social workers, and educators with an interest in child development, cognitive and language enhancement, and adoption and fostering more broadly. Adoptive parents will also benefit from this book and its focus on themes of attachment, parenting, and the development of social cognition.
