Understanding and Using English Grammar Betty Schramper Azar, Azar, 2000-01-01 *Understanding and Using English Grammar* is a classic developmental skills text for students of English as a second of foreign language This Workbook consists solely of self study exercises providing students the opportunity to explore and practice grammar independently It is keyed to the explanatory grammar charts in both the Student book and the Chartbook *Discourse Constructions in English* Aneider Iza Erviti, 2021-05-29 This book emphasizes the advantages of examining discourse connectivity from a constructionist perspective and highlights the role of discourse configurations in the construction of meaning The research contained advances the field of cognitive classification and categorization of discourse constructions The text is a great improvement in the discourse analysis literature since it uniquely clarifies the subtleties of meaning between different discourse markers that are frequently treated as equivalent by lexicographers It is unique in being the first contribution to the creation of a

Construction at the discourse level and it fills an important gap within cognitively oriented constructionist accounts that have mostly restricted their analyses to argument structure and illocutionary constructions This yearbook appeals to students and researchers working within corpus linguistics

Epistemic Stance in English Conversation Elise Kärkkäinen,2003 This book is the first corpus based description of epistemic stance in conversational American English It argues for epistemic stance as a pragmatic rather than semantic notion showing commitment to the status of information is an emergent interactive activity rooted in the interaction between conversational co participants The first major part of the book establishes the highly regular and routinized nature of such stance marking in the data The second part offers a micro analysis of I think the prototypical stance marker in its sequential and activity contexts Adopting the methodology of conversation analysis and paying serious attention to the manifold prosodic cues attendant in the speakers utterances the study offers novel situated interpretations of I think The author also argues for intonation units as a unit of social interaction and makes observations about the grammaticization patterns of the most frequent epistemic markers notably the status of I think as a discourse marker

Information Status and Noncanonical Word Order in English Betty J. Birner,Gregory L. Ward,1998-01-01 This work provides a comprehensive discourse functional account of three classes of noncanonical constituent placement in English preposing postposing and argument reversal and shows how their interaction is accounted for in a principled and predictive way In doing so it details the variety of ways in which information can be given or new and shows how an understanding of this variety allows us to account for the distribution of these constructions in discourse Moreover the authors show that there exist broad and empirically verifiable functional correspondences within classes of syntactically similar constructions Relying heavily on corpus data the authors identify three interacting dimensions along which individual constructions may vary with respect to the pragmatic constraints to which they are sensitive old vs new information relative vs absolute familiarity and discourse vs hearer familiarity They show that preposed position is reserved for information that is linked to the prior discourse by means of a contextually licensed partially ordered set relationship postposed position is reserved for information that is new in one of a small number of distinct senses and argument reversing constructions require that the information represented by the preverbal constituent be at least as familiar within the discourse as that represented by the postverbal constituent Within each of the three classes of constructions individual constructions vary with respect to whether they are sensitive to familiarity within the discourse or assumed familiarity within the hearer s knowledge store Thus although the individual constructions in question are subject to distinct constraints this work provides empirical evidence for the existence of strong correlations between sentence position and information status The final chapter presents crosslinguistic data showing that these correlations are not limited to English
