2024 held in Potsdam Germany during September 26 27 2024 The 15 full papers and 4 short papers presented here were carefully reviewed and selected from 28 submissions These papers have been categorized into the following topical sections Advances in Human Activity Recognition Applications in Vision Based Recognition Wearable Devices and Health Monitoring Novel AI and Machine Learning Approaches Short Papers Emerging Topics in Sensor Based Systems **The Dynamic Structure of Everyday Life** Philip Agre,Massachusetts Institute of Technology. Artificial Intelligence Laboratory,1988 A running argument means continually redeciding what to do Continually redeciding what to do is more flexible than executing a plan because it is more responsive to opportunities and contingencies It is possible to approximate the ideal of continual redecision because life is wholly a routine The routine portion of the reasoning leading to each moment s action can be implemented very efficiently by recording the reasons behind any novel bits of reasoning a method known as dependency maintenance A computer program called the running argument illustrates this point British Museum Catalogue of printed Books ,1897 **The Literary World** ,1893 **The Current Digest of the Soviet Press** ,1969 AI IN EVERYDAY LIFE: TRANSFORMING SOCIETY Dr. Abhinandan Singh Dandotiya,Dr. Shashi Kant Gupta,Dr. Nidhi Dandotiya,Mr. Palash Sharma,2024-09-18 Artificial Intelligence AI has rapidly woven itself into the fabric of everyday life transforming how society operates in profound ways Its integration into various aspects of daily routines has led to increased efficiency and convenience from personalized recommendations on streaming platforms to automated customer service AI s ability to analyze vast amounts of data and learn from it has enabled more intelligent decision making processes enhancing productivity across industries This technological advancement has also facilitated the development of smart homes and cities where AI driven systems manage everything from energy consumption to traffic flow creating environments that are more responsive to human needs Beyond convenience AI is reshaping the workforce and education requiring societies to adapt to new modes of work and learning Automation is taking over repetitive tasks freeing up human workers to focus on more complex and creative endeavors However this shift also raises concerns about job displacement and the need for reskilling In education AI driven personalized learning systems are providing tailored educational experiences helping to bridge gaps in knowledge and cater to individual learning styles These changes are prompting a reevaluation of traditional educational models and career paths highlighting the need for continuous learning and adaptability On a broader scale AI is playing a critical role in addressing global challenges such as climate change healthcare and resource management In healthcare AI powered diagnostic tools are improving the accuracy and speed of disease detection leading to better patient outcomes In environmental management AI is being used to monitor and predict environmental changes aiding in the development of sustainable practices As AI continues to evolve its impact on society will only deepen presenting both opportunities and challenges that require careful consideration and responsible governance to ensure that its benefits are equitably distributed
