Who Made the Moon? Sigmund Brouwer, Prepare yourself for questions every parent or friend of a searcher must answer As bestselling author Sigmund Brouwer began to hear more and more questions about creation from his growing daughters he realized that the issue could easily turn them away from developing faith in God Was he going to stand by and let them wrestle alone with widely asserted contradictions between science and Genesis especially as they got older Or could he prepare himself to help them understand

more clearly the truth in the Bible's foundation. In *Who Made the Moon*, Brouwer engages the reader by combining easily understood science concepts with inspirational stories from a loving father's heart. He says, "I believe it's my responsibility to know enough about both the Bible and science to answer the difficult questions I want to be able to show my children that truth is indivisible and that faith in the God of Genesis has nothing to fear from science."

A to Z of Physicists, Updated Edition Darryl Leiter, 2019-11-01. *A to Z of Physicists, Updated Edition* focuses not only on the lives and personalities of those profiled but also on their research and contributions to the field. A fascinating and important element of this work is the attention paid to the obstacles that minority physicists had to overcome to reach their personal and professional goals. Through incidents, quotations, and photographs, the entries portray something of the human face, which is often lost in books on science and scientists. *A to Z of Physicists, Updated Edition* features more than 150 entries and 51 black and white photographs. Culturally inclusive and spanning the whole range of physicists from ancient times to the present day, this is an ideal resource for students and general readers interested in the history of physics or the significant aspects of the personal and professional lives of important physicists. People covered include Archimedes (ca. 285–212 BCE), Homi Jehangir Bhabha (1909–1966), Pavel Alekseyevich Cherenkov (1904–1990), Marie Curie (1867–1934), George Gamow (1904–1968), Tsung Dao Lee (1926–present), Lise Meitner (1878–1968), Yuval Ne'eman (1925–2006), Johannes Stark (1874–1957), Nikola Tesla (1856–1943), Alessandro Volta (1745–1827), Hideki Yukawa (1907–1981).

Modern Technology and Sciences... in the Bible Alla Peace, John Anderson, 2012-12-26. Based exclusively on the biblical verses, the book *Modern Technology and Sciences in the Bible* reveals outstanding facts that modern discoveries are actually a rediscovery of remote ancient knowledge, practically in all major fields of technology and sciences. Each biblical quotation on these subjects has been analyzed, comparing them with modern knowledge in technology, astronomy, cosmology, physics, geology, biology, medicine, and metaphysical philosophy. It proves that this high level of knowledge actually belonged to a sophisticated prehistoric civilization. It also concludes that original, unknown biblical texts are just pieces of vanished records left behind by an advanced society of aliens, biblical gods that visited and settled on the earth before our time. The book is supported by an appendix which includes a glossary, glossary of persons, geographical glossary, measurements, bibliography, and maps.

The Mystery of Death Jean Donovan, 2003. Jean Donovan, professor, lay minister, and crisis worker, offers a Christian understanding of one of life's greatest mysteries: death. In material divided into several cogent and succinct chapters, she discourses on the subject and its concomitant issues: evil, pain, suffering, acceptance, and happiness. The result is *The Mystery of Death*, a probing theological account of questions that deeply perplex humankind: Where is God in the face of evil? And why does God permit human beings to suffer and die? Complete with references from the Bible, Dante, and C. S. Lewis, among others, this is a compassionate and scholarly contribution to thanatology. Written in precise and careful language, this book is recommended for individual readers searching for the meaning of death, theological seminaries, medical and nursing schools, social workers who work with the sick, and the

bereaved Clergy of all faiths Students of psychology *Stephen Hawking* John Bankston, 2005 A biography of Stephen Hawking credited with proving the big bang theory mathematically **Hawking** Jim Ottaviani, 2019-07-02 Following their New York Times bestselling graphic novel Feynman Jim Ottaviani and Leland Myrick deliver a gripping biography of Stephen Hawking one of the most important scientists of our time From his early days at the St Albans School and Oxford Stephen Hawking's brilliance and good humor were obvious to everyone he met A lively and popular young man it's no surprise that he would later rise to celebrity status At twenty one he was diagnosed with ALS a degenerative neuromuscular disease Though the disease weakened his muscles and limited his ability to move and speak it did nothing to limit his mind He went on to do groundbreaking work in cosmology and theoretical physics for decades after being told he had only a few years to live He brought his intimate understanding of the universe to the public in his 1988 bestseller *A Brief History of Time* Soon after he added pop culture icon to his accomplishments by playing himself on shows like *Star Trek* *The Simpsons* and *The Big Bang Theory* and becoming an outspoken advocate for disability rights In *Hawking* writer Jim Ottaviani and artist Leland Myrick have crafted an intricate portrait of the great thinker the public figure and the man behind both identities **The Art of Being Human** Richard Paul Janaro, Thelma C.
