Steaming Mad:

Metonymy and Word-Formation Mario Brdar,2018-01-23 This book deals with the interplay between word formation and metonymy It shows that like metaphor metonymy interacts in important ways with morphological structure but also warns us against a virtually unconstrained conception of metonymy The central claim here is that word formation and metonymy are distinct linguistic components that complement and mutually constrain each other Using linguistic data from a variety of languages the book provides ample empirical support for its thesis It is much more than a systematic study of two neglected linguistic phenomena for a long time thought to be unimportant by linguists Through exposing and explaining the intricate interaction between metonymy and word formation from a cognitive linguistic perspective the reader is presented with a sense of the amazing complexity of the development of linguistic systems This book will be essential reading for scholars and advanced students interested in the role of figuration in grammar
