The Changing American Countryside Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life **Introduction**

to Rural Planning Nick Gallent,Meri Juntti,Sue Kidd,Dave Shaw,2008-01-14 Providing an overview of rural spatial planning for students on planning geography and related programmes this book charts the major patterns and processes of rural change affecting the British countryside its landscape its communities and its economies in the twentieth century The authors examine the role of planning in shaping rural spaces not only the statutory comprehensive planning that emerged in the post war period but also planning and rural programme delivery undertaken by central regional and local policy agencies The book is designed to accompany a typical teaching programme in rural planning and considers the nature of rural areas and the emergence of statutory planning in England the agents of rural policy delivery and the potential for current planning practice to become a policy hub at the local level co ordinating the actions and programmes of different agents economic change in the countryside and the influence planning has in shaping rural economies social change the nature of rural communities and recent debates on housing and rural service provision environmental change the changing fortunes of farming landscape protection and the idea of a multi functional landscape made by forces that can be shaped by the planning process key areas of current concern in spatial rural planning including debates surrounding city regions the rural the challenge of managing rural change in the twenty first century through new planning and governance processes A comprehensive coverage of the forces processes and outcomes of rural change whilst keeping planning s influence and role

Sorokin** Barry V. Johnston,1995 Pitirim A Sorokin 1889 1968 was one of the most original important and controversial figures in American sociology His spectacular rise from a peasant childhood in Czarist Russia to the Olympian heights of Harvard University provides an unlikely and fascinating lens for examining the history of an entire discipline And as Barry Johnston shows his equally dramatic fall from favor and unexpected resurrection illuminate both Sorokin s life and the tempestuous world of academic politics An outspoken revolutionary and secretary to Alexander Kerensky Sorokin was imprisoned and ordered executed by Lenin then reprieved and exiled During the 1920s he flourished as a teacher and scholar at the University of Minnesota where he published several pioneering books on the Russian Revolution social mobility sociological theory and rural sociology Harvard president A Lawrence Lowell was so impressed that he recruited Sorokin to chair the university s first department of sociology From 1930 to 1944 the department prospered under Sorokin s leadership attracting an entire generation of young scholars who in their own right would have a profound impact on the discipline In this period Sorokin published several volumes of his magnum opus *Social and Cultural Dynamics* and became embroiled in a bitter battle with rival Talcott Parsons for control of the department Parsons ultimately deposed Sorokin and transformed sociology into the Department of Social Relations Sorokin nevertheless stayed on at Harvard where he established the Center for Creative Altruism but otherwise continued to work in relative obscurity Finally in 1963 after years in eclipse Sorokin was recognized for his accomplishments when he was elected president of the American Sociological Association During a long and distinguished career Sorokin amassed an amazingly diverse and substantial body of work much of which set the standard for the field At the same time he broke with the conventions of sociology frequently ridiculing and taunting his less adventurous colleagues For his heresy the flamboyant Sorokin was condemned and driven to the periphery of a profession anxious for legitimacy as a science As a result Sorokin s ideas have been consistently ignored and misunderstood for more than a quarter century Based on exhaustive research in Sorokin s papers and the Harvard archives as well as interviews with Sorokin s surviving family members former students and colleagues this biography restores Sorokin to his rightful place in the pantheon of American intellectuals *Strategies for Managing Global Environmental Risks* German Advisory Council on Global Change,2000-03-15 Global risk potentials and their interplay with economic social and ecological processes of change have emerged as a challenge to the international community By presenting this report the Council hopes to contribute constructively to an effective efficient and objective management of the risks of global change The approach taken by the Council is first to classify globally relevant risks and then to assign to these classes of risk both established and innovative risk assessment strategies and risk management tools On this basis management priorities can be set The Council further recommends a number of cross cutting strategies for

international policies These include worldwide alignment of liability law creation of environmental liability funds establishment of a United Nations Risk Assessment Panel and implementation of strategies aimed at reducing vulnerability to risk
