Strategy Process Shaping The Contours Of The Field:

STRATEGY PROCESS: SHAPING THE CONTOURS OF THE FIELD; ED. BY BALA CHAKRAVARTHY. ,2003

Strategy Process Bala Chakravarty, Guenter Mueller-Stewens, Peter Lorange, Christoph Lechner, 2003-02-14 This book provides an overarching framework for cumulating the knowledge in the strategy process field Provides an overarching framework within which to review the strategy process field Identifies useful areas in which new research contributions can be made Helps in the appropriate design of this research Includes ten papers written by both North American and European scholars Part of the Strategic Management Society series *Innovating Strategy Processes* Steven W. Floyd, Johan Roos, Claus D. Jacobs, Franz W. Kellermanns, 2009-02-09 *Innovating Strategy Process* presents a series of reflective essays by established and emerging scholars on the subject of innovation considering it both as an outcome of strategy and as a process in itself Contains new ideas and rich case descriptions that will trigger creative thinking about how to design a more innovative strategy process Offers new conceptual frameworks for analyzing and designing strategy process Addresses cutting edge topics such as play as the means and art as the impetus for strategy making the role of emotion in new venture decision making and science and entrepreneurship as a source of innovative strategies Signals the future direction of the field *The Paradoxical Foundation of Strategic Management* Andreas Rasche, 2007-10-25 This book offers a systematic critique of the scientific discourse of strategic management It uncovers scholars unquestioned assumptions and shows that by upholding these assumptions researchers obscure the paradoxical nature of strategic reasoning To uncover the paradoxes of strategic management the author refers to the philosophy of Jacques Derrida He exposes the paradoxes that inevitably occur when theorizing about corporate strategy along the dimensions strategy context process and content and shows how these paradoxes can enrich future thinking about strategic problems The analysis is completed by a discussion of theoretical and practical implications which highlight the need to research strategy not as something an organization has but as something an organization does Such a practice perspective gives reference to the paradoxical ground that strategic management rests on and enriches scholars ability to reflect on practitioners tasks while doing strategy in organizations

Determinants of the Performance of Strategic Initiatives Wolfgang Kaltenbrunn, 2009-11-02 Foreword Since the first studies by Bower and Burgelman in the early 1980 s on the phenomenon of strategic initiatives the use of strategic initiatives in the strategic management of diversified organizations now is omnipresent Strategic initiatives are seen as efficient answers of management teams for pressing challenges By making use of strategic initiatives managers can proceed flexibly and with entrepreneurial vigor from broad ideas toward specific commitments Managing initiatives is perceived as a complex challenge by most managers Empirical studies show that about 70% of all strategic initiatives fail to reach their goals This statistic shows us that successful management and implementation of strategic initiatives requires a multitude of diverse managerial skills To date the complexity of strategic initiatives is most often not fully taken into account in strategic

management research Almost all studies investigating strategic initiatives have concentrated either on the external or internal organizational context or have solely identified contextual factors that undermine the successful implementation of strategic initiatives This underscores the fact that most prior research on the relationship between the organizational context and strategic initiatives is too narrow and suggests the need for a more holistic approach

The Role of the Social Context for Strategy-Making Karolin Marx,2012-12-06 v Foreword Over the years strategic initiatives have received increasing importance as core vehicles for strategy making These coordinated undertakings enable firms to reinforce the current strategy or alter it in order to realign the organization in accordance with changed environmental conditions Despite the growing importance of strategic initiatives the overall understanding of their professional management is still limited While previous research has acknowledged the importance of the organizational context for the successful development of strategic initiatives so far only little research has focused on this important link Especially the social side of the organizational context has remained under investigated Karolin Marx addresses this shortcoming and analyzes the role of the social context represented by the embeddedness of the initiative team in the intrafirm network for strategy making As initiatives are pursued by teams it is reasonable to assume that the type and quality of the team s social relations to other organizational units impacts the thinking and behavior within the team and thus the performance of the initiative

Management of Regulatory Influences on Corporate Strategy and Structure Sebastian Frankenberger,2007-10-29 Foreword In recent years regulation and deregulation issues grew into a major concern of corporate management Asked about their biggest pain points managers from different businesses not only network based industries like telecommunications transportation and energy but also chemicals or food and beverages mentioned uncertainty resulting from regulation Despite this fact strategic management has so far widely neglected the interactions and inter dependencies between corporate and regulatory actors With this dissertation the author aims at closing this gap through a better integration of external regulatory actors into the strategy formation process More specifically he asks how regulatory actors impact corporate strategy and structure and how corporate management can proactively manage this type of external involvement Based on an extensive literature review the author shows that extant models of the strategy formation process focus almost exclusively on actors internal to the firm external actors are widely neglected In general they have been condensed under rather abstract conditions of the environment such as uncertainty or complexity If explicitly considered only selected elements e g innovativeness diversification or organizational design have been analyzed in primarily content based quantitative cross sectional studies A broader understanding of the complex inter dependencies and mutual influences between corporate and external actors remains lacking

Systemic Management for Intelligent Organizations Stefan N. Grösser, René Zeier,2012-10-17 The last two decades increasingly have challenged the field of management by confronting it with rapidly growing levels of dynamism interconnectedness and complexity Systems based management approaches their promise already proven offer great potentials for influencing and

coping with this development This collection of essays offers ideas and exemplary case studies from experts in systemic management organizational cybernetics and system dynamics for meeting the challenges in socio economic systems This book was compiled to honor the academic achievement of Markus Schwaninger a leading protagonist in developing the field of systemic management and organizational cybernetics His stature in the field is demonstrated in the forewords by Raul Espejo and John Sterman The efforts of 18 researchers and practitioners all closely related to Markus Schwaninger offer conceptual and empirical approaches that will allow managers and advanced students of the management profession to analyze understand and design intelligent organizations The book weaves its content from both theory and practice and offers hints for improving a variety of organizations both private and public profit and non profit and large and small
