The Seattle Street-Smart Naturalist David B. Williams, 2012-11-15 Back to the city or back to nature Seattle author David Williams shows us how we can get the best of both Botany and bugs geology and geese and creeks and crows living in a major city doesn't have to separate us from the natural world Stepping away from a guidebook format Williams presents the reader with a series of essays and maps that weave personal musings bits of humor natural history observations and scientific data into a multi textured perspective of life in the city descriptions of his journeys as a naturalist in an urban landscape Williams addresses questions that an observant person asks in an urban environment What did Seattle look like before Europeans got here How does the area's geologic past affect us Why have some animals thrived and other languished How are we affected by the species with whom we share the urban environment and how do we affect them This book captures all of the distinctive flavors of the Emerald City urban and natural [A Naturalist's Guide to Canyon Country](#) David Williams, 2020-05-01 Published in cooperation with Canyonlands Natural History Association this comprehensive and beautifully illustrated trailside reference describes more than 270 plants and animals plus geology of an area that includes nine national parks and monuments in the Southwest A Naturalist's Guide to Canyon Country is the essential tool for exploring the northern Colorado Plateau that vast province that encompasses eastern Utah far western Colorado and sections of northern Arizona and New Mexico With this fully updated and revised guide in hand you will gain a sympathetic understanding of the desert ecosystems that make up the region

Too High and Too Steep David B. Williams, 2015-09-01 Residents and visitors in today's Seattle would barely recognize the landscape that its founding settlers first encountered As the city grew its leaders and inhabitants dramatically altered its topography to accommodate their changing visions In Too High and Too Steep David B Williams uses his deep knowledge of Seattle scientific background and extensive research and interviews to illuminate the physical challenges and sometimes startling hubris of these large scale

transformations from the filling in of the Duwamish tideflats to the massive regrading project that pared down Denny Hill In the course of telling this fascinating story Williams helps readers find visible traces of the city s former landscape and better understand Seattle as a place that has been radically reshaped Too High and Too Steep was made possible in part by a grant from 4Culture s Heritage Program [SEJ Journal](#) ,2005 [The Writers Directory](#) ,2013 **Washington Park Arboretum Bulletin** ,2005 [Seattle Walks](#) David B. Williams,2017 Seattle Walks is an idiosyncratic walking guide to Seattle combining natural history human history and David Williams s unique store of knowledge as a life long and very curious resident of Seattle The walks offer surprises for those who think they know Seattle well and will be very appealing to Seattle newcomers and tourists seeking an active way to get to know the city [Cairns](#) David B. Williams,2000 Comprehensive and beautifully illustrated trailside refernce to plants animals and geology of an area that includes nine national parks and monuments *The Street-smart Naturalist* David B. Williams,2005 **Stories in Stone** David B. Williams,2009-06-30 Most people do not think to look for geology from the sidewalks of a major city but for David B Williams any rock used as building material can tell a fascinating story All he has to do is look at building stone in any urban center to find a range of rocks equal to any assembled by plate tectonics In Stories in Stone he takes you on his explorations to find 3 5 billion year old rock that looks like swirled pink and black taffy a gas station made of petrified wood and a Florida fort that has withstood 300 years of attacks and hurricanes despite being made of a stone that has the consistency of a granola bar In Stories in Stone Williams also weaves in the cultural history of stone He shows why a white fossil rich limestone from Indiana became the only building stone to be used in all 50 states how in 1825 the construction of the Bunker Hill Monument led to America s first commercial railroad and why when the same kind of marble used by Michelangelo was used on a Chicago skyscraper it warped so much after 19 years that all 44 000 panels of the stone had to be replaced A love letter to building stone from New England brownstone and Morton Gneiss of Minnsota to the limestone of Salem Indiana from granite and travertine to Carrara marble David Willilams brings to life the stones you will see in the structures of every city large and small After reading his book you will forever look at stone buildings with new eyes
