The Learning of Mathematics

Wayne Gary Martin, Marilyn E. Strutchens, Portia C. Elliott, 2007 Learning mathematics is the central goal of mathematics education yet it is the least frequently addressed of NCTM's Principles and Standards. With an increasing population of English language learners and the inclusion of students with learning disabilities into the regular mathematics classroom, how can all the differentiated needs be met in one classroom? What is the balance between focusing on developing concepts and memorisation of certain facts and rules? The Learning of Mathematics, NCTM's sixty-ninth yearbook, furthers the discourse on learning with five main areas: how students learn, students learning in school contexts, measuring and interpreting students learning, teachers learning of mathematics, and reflections on mathematics teaching and learning.

Connected Mathematics, 2004 Contains a complete sixth grade mathematics curriculum with connections to other subject areas.
