[Aircraft Management Activities. A Systematic Review](#) Muflaha Jafar,2024-10-10 Master s Thesis from the year 2024 in the subject Business economics Project Management London Metropolitan University language English abstract This systematic review seeks to answer the questions regarding the development process

efficiency issues and trends in the application of aircraft maintenance and management approaches. With ongoing changes in regulatory requirements, technological development, and cost control remaining critical issues for the aviation industry, it is therefore imperative to gain an appreciation of the evolution of maintenance practices. The review is based on the collection of secondary qualitative articles from various peer-reviewed papers and industry reports starting from the year 2000. The main themes explored in the review include historical overview, change from reactive to proactive maintenance techniques, preventive, predictive, and condition-based maintenance techniques and strategies. The work shows that there is a rather sharp shift from what the authors call the reactive maintenance paradigm, where the primary objective is to repair failed assets, to the so-called smart maintenance, which is based on the use of big data and analytics, AI, robotics, digital twins, and the like. Among new effective methodologies, we can single out predictive and condition-based maintenance, which taking advantage of real-time data analytics and sensor technologies, proved their effectiveness in terms of reducing the time spent on failures, costs, and increasing safety in comparison with previous methods.

Evaluation of Potential Use Cases for Blockchain in the Insurance Industry Ricardo Escoda, 2021-03-09. Master's Thesis from the year 2020 in the subject Economics Finance, grade 1-3, International School of Management Campus Munich, language English. Abstract: Blockchain is considered to be a breakthrough technology with many strengths and opportunities but also weaknesses and threats for all industries around the globe. It has the potential to revolutionize many sectors but it is not a universal remedy and does not replace every single traditional technology. Most businesses do feel insecure whether to invest time and money for Research and Development due to the lack of industry standards and regulations with respect to the technology. Before being able to guarantee suitability and successful implementation in any business, it is essential to study the differences between public, private, hybrid, and consortium Blockchain types. In areas of application not strongly relying on Blockchain's distributed systems, alternative solutions such as Big Data Analytics, Artificial Intelligence, and Machine Learning might be more valuable. Nonetheless, Blockchain promises the unique potential for insurance companies to efficiently serve global markets with areas of application mainly concentrating on parts of the VC where bureaucracy can be reduced by automation. For instance, the use of Smart Contracts, where lots of data are analyzed, saved, distributed, and processed. By implementing BC fields where the focus is on customer experience, such as Payments, Data Security, Transparency, and Developing New Business and Product Ideas, can be improved enormously. Use cases and new products supported by Blockchain might include P2P Micro Insurances, Ad hoc and Parametric Insurance Models, Automated Underwriting, Reduction of Fraud and Abuse, and Health Insurance Processes, Real Time Analytics in the Form of SCs, Instant Pay Outs, Automated Claims Management, and Improved Risk Modelling of Insurance Businesses might be achievable by connecting Blockchain and Big Data. Contrary to the expectations of the author, most industry experts are aware of the benefits and opportunities the technology can bring to their companies. Still, Blockchain is not anchored in their medium to long-term visions and strategies. Most of the interviewees

would rather act as active observers and early followers than taking the lead proactively Reasons for this behavior are the lack of market standards and regulations the absence of solid Blockchain networks and the shortage of use cases but also the lack of know how and data security concerns *The Cryptogram* ,1979 **The British National Bibliography** Arthur James Wells,2006 *Communications--fusing Command, Control, and Intelligence* ,1992 **The Software Encyclopedia** ,1988 **The Parliamentary Debates (Hansard)**. Great Britain. Parliament. House of Lords,2008 Contains the 4th session of the 28th Parliament through the session of the Parliament **Personal Computer Age** ,1983-07 **Trends and Developments in Entrepreneurial Finance. Implications for a Startup's Signaling Strategy** Alexander Kolloge,2018-09-10 Bachelor Thesis from the year 2018 in the subject Business economics Investment and Finance grade 1 0 University of Mannheim Chair of Strategic and International Management Prof Dr Matthias Brauer language English abstract The landscape of entrepreneurial finance is currently subject to a process of transformation driven by globalization technological advancements regulatory adjustments and the emergence of winner take all markets These factors jointly pave the way for new forms of financing which differ significantly from traditional forms in terms of investor structure experience and behavior To analyze how startups can ensure financial coverage in the light of these changing conditions this review compares strategies of attracting traditional and new types of investors from a signaling perspective In business practice this topic is highly relevant as many young startups require substantial amounts of external capital to grow but often have no objective firm data to provide to investors Thus the selection of effective soft signals about startup quality preferably aligned with the preferences of the respective investor group can decide about short term survival and long term performance Findings include that the most promising signaling strategies for traditional forms of financing are based on startup characteristics i e what a firm is In contrast the most effective signals for new forms of financing are based on startup actions i e what a firm does Moreover while personal networks have been found to be highly relevant for traditional forms online networks increase the funding prospects for new forms of financing Through a consolidation and analysis of the current state of research in leading management entrepreneurship and finance journals this review aims at providing a comprehensive overview of the issue and identifying avenues for future research [Books to Come; Bowker's Advance Book Reporting Service](#) ,1960 **Digital Supply Networks: Transform Your Supply Chain and Gain Competitive Advantage with Disruptive Technology and Reimagined Processes** Amit Sinha,Ednilson Bernardes,Rafael Calderon,Thorsten Wuest,2020-07-21 Deliver unprecedented customer value and seize your competitive edge with a transformative digital supply network Digital tech has disrupted life and business as we know it and supply chain management is no exception But how exactly does digital transformation affect your business What are the breakthrough technologies and their capabilities you need to know about How will digital transformation impact skills requirements and work in general Do you need to completely revamp your understanding of supply chain management And most importantly How do you get started Digital

Supply Networks provides clear answers to these and many other questions Written by an experienced team comprised of Deloitte consultants and leading problem driven scholars from a premier research university this expert guide leads you through the process of improving operations building supply networks increasing revenue reimagining business models and providing added value to customers stakeholders and society You ll learn everything you need to know about Stages of development roles capabilities and the benefits of DSN Big data analytics including its attributes security and authority Machine learning Artificial Intelligence Blockchain robotics and the Internet of Things Synchronized planning intelligent supply and digital product development Vision attributes technology and benefits of smart manufacturing dynamic logistics and fulfillment A playbook to guide the digital transformation journey Drawing from real world experience and problem driven academic research the authors provide an in depth account of the transformation to digitally connected supply networks They discuss the limitations of traditional supply chains and the underlying capabilities and potential of digitally enabled supply flows The chapters burst with expert insights and real life use cases grounded in tomorrow s industry needs Success in today s hyper competitive fast paced business landscape characterized by the risk of black swan events such as the 2020 COVID 19 global pandemic requires the reimagination and the digitalization of complex demand supply systems more collaborative and connected processes and smarter more dynamic data driven decision making which can only be achieved through a fully integrated Digital Supply Network
