Specification and Proof in Real Time CSP Jim Davies,1993-05-20 The research contained in this book represents work on the specification and verification of real time systems using CSP   Formal Methods and Software Engineering Zhiming Liu,Jifeng He,2006-10-24 This book constitutes the refereed proceedings of the 8th International Conference on Formal Engineering Methods ICFEM 2006 held in Macao China in November 2006 The 38 revised full papers presented together with three keynote talks were carefully reviewed and selected from 108 submissions The papers address all current issues in formal methods and their applications in software engineering   Formal Description Techniques ,1996   **PARLE '89 - Parallel Architectures and Languages Europe** Eddy Odijk,Martin Rem,1989 Since the first PARLE conference PARLE 87 attracted more than 300 participants it was considered a useful and successful forum and encouraged the organization of this second issue known as PARLE 89 The initiative for these conferences was taken by project 415 of ESPRIT the European Strategic Programme for Research and Development in Information Technology of the Commission of the European Communities Their scope covers central themes in the area of parallel architectures and languages including such topics as concurrent object oriented logic and functional programming MIMD dataflow inference and reduction machines design and verification of parallel systems VLSI WSI and RISC architectures performance evaluation memory management systolic arrays applications and special purpose architectures The four invited lectures present the state of the art and advanced developments in major research areas related to the topics of the conference Of the more than 150 submitted papers 45 were selected for presentation Furthermore the program of PARLE 89 comprises presentations on the subprojects which together constitute ESPRIT project 415 Parallel architectures based on a variety of programming styles object oriented logic functional dataflow are represented in these overviews   **CONCUR '95 Concurrency Theory** Insup Lee,1995-09-09 This book constitutes the proceedings of the 6th International Conference on Concurrency Theory CONCUR 95 held in Philadelphia Pennsylvania in August 1995 The volume presents seven invited contributions by outstanding researchers and 33 refereed full research papers selected by the program committee out of a total of 91 submissions The collection of articles gives a representative overview on what happened in this area of research since the last CONCUR conference took place There are sections on model checking mobile processes process theory true concurrency process algebra probabilistic automata real time systems testing semantics decidability results refinement theory and linear time logics   Formal Description Techniques VIII Gregor von Bochmann,Rachida Dssouli,Omar Rafiq,1996-01-31 Contains the research results on formal description techniques applicable to telecommunications covering their theoretical foundations industrial applications and practical usage   *Fifth International Workshop on Software Specification and Design* International Workshop on Software Specification and Design,1989   Safe Comp 96 Erwin Schoitsch,2012-12-06 SAFECOMP 96 contains papers presented at the 15th International Conference on Computer Safety Reliability and Security held in Vienna Austria 23 25

October 1996 The conference aimed to provide an opportunity for technical developers and users to discuss and review their experiences to consider the best technologies currently available and to identify the skills and technologies required for the future SAFECOMP 96 focuses on critical computer applications and is intended as a platform for technology transfer between academia industry and research institutions SAFECOMP 96 will be of interest to all those in universities research institutions industry and business who want to be well informed about the current international state of the art in computer safety reliability and security **Real-time Systems** H. S. M. Zedan,1990 Distributed real time computing systems have become a fast growing area of research and development This book is the result of a forum which brought together a number of practitioners and researchers in the field from both industry and universities The papers are wide ranging covering topics such as logic and semantics of distributed real time computations specification and the design of real time systems and reliability issues for existing real time systems The main features of the book are 1 Recent advances in the theory of real time systems and computations 2 New developments in specification and design methodologies for real time systems 3 Description of existing working real time control systems *Mathematical Reviews* ,1999 *Technical Report* ,

Realtime Systems Nimal Nissanke,1997 Real Time computing is one of th most demanding and challenging areas in computing It is also of great importance since real time software is indispensable to all ultra reliable and safety critical applications The objective of this book is to provide an introduction to the whole area of real time computing Although it boundaries are bit well defined the body of knowledge relevant to the study of real time systems encompasses a whole range of topics There are issues such as clocks specificiation design and modelling of real time systems which are exclusive to the study of real time systems There are also a number of fairly independant topics having applications outside real time systems but with a deinite real time dimension The book supplies a framework for the study of real time systems facilitating a higher level of abstraction and a sharper focus on concepts and issued Invariably this framework relies on mathematics but the mathematics are explained and kept to the minimum Most chapters are self contained and each deals with a separate topic The exceptions are Chapters 2 4 since they contain notations and concepts used elsewhere The occasional cross reference between chapters are intended to underlinethe coherence of the material rather than the depence of topics *FME 2001: Formal Methods for Increasing Software Productivity* Jose N. Oliveira,Pamela Zave,2003-06-29 FME 2001 is the tenth in a series of meetings organized every eighteen months by Formal Methods Europe FME an independent association whose aim is to stimulate the use of and research on formal methods for software development It follows four VDM Europe Symposia four other Formal Methods Europe S posia and the 1999 World Congress on Formal Methods in the Development of Computing Systems These meetings have been notably successful in bringing gether a community of users researchers and developers of precise mathematical methods for software development FME 2001 took place in Berlin Germany and was organized by the C puter Science Department of the Humboldt Universit at zu Berlin The theme of the symposium was

Formal Methods for Increasing Software Productivity This theme recognizes that formal methods have the potential to do more for industrial software development than enhance software quality they can also increase productivity at many di erent points in the software life cycle The importance of the theme is borne out by the many contributed papers showing how formal methods can make software development more e cient There is an emphasis on tools that nd errors automatically or with relatively little human e ort There is also an emphasis on the use of formal methods to assist with critical labor intensive tasks such as program design and test case generation **Protocol Specification, Testing, and Verification, IX** Ed Brinksma,Giuseppe Scollo,Chris A. Vissers,1990 Researchers and practitioners concerned with the application of formal methods to the design description analysis implementation and testing of open systems contributed to this book It is the ninth in a successful series of annual volumes **Algebraic Methodology and Software Technology** ,1993 Algebraic Methodology and Software Technology (AMAST'91) M. Nivat,1994 The goal of the AMAST conferences is to foster algebraic methodology as a foundation for software technology and to show that this can lead to practical mathematical alternatives to the ad hoc approaches commonly used in software engineering and development The first two AMAST conferences held in May 1989 and May 1991 at the University of Iowa were well received and encouraged the regular organization of further AMAST conferences on a biennial schedule The third Conference on Algebraic Methodology and Software Technology was held in the campus of the University of Twente The Netherlands during the first week of Summer 1993 Nearly a hundred people from all continents attended the conference The largest interest received by the AMAST conference among the professionals extended to include the administration organizations as well AMAST 93 was opened by the Rector of the University of Twente followed by the Local Chairman Their opening addresses open this proceedings too The proceedings contains 8 invited papers and 32 selected communica tions The selection was very strict for 121 submissions were received **Fourth International Conference on High Performance Computing** IEEE Computer Society. Technical Committee on Parallel Processing,1997 This text on high performance computing includes coverage of the topics applications I O and compilers scientific computing data and file management interconnection networks compilers image and signal processing distributed systems algorithms architecture and parallel programming *Real-time Systems* Krishna M. Kavi,1992 *Convergence and Hybrid Information Technology* Geuk Lee,Daniel Howard,Dominik Ślęzak,2011-09-14 This book constitutes the refereed proceedings of the 5th International Conference on Convergence and Hybrid Information Technology ICHIT 2011 held in Daejeon Korea in September 2011 The 85 revised full papers presented were carefully reviewed and selected from 144 submissions The papers are organized in topical sections on communications and networking motion video image processing security systems cloud RFID and robotics industrial application of software systems hardware and software engineering healthcare EEG and e learning HCI and data mining software system and its applications **CONCUR ...** ,1995
