Public Law? Mark Elliott, Jason NE Varuhas, Shona Wilson Stark, 2018-04-19 This major collection contains selected papers from the second Public Law Conference an international conference hosted by the University of Cambridge in September 2016 The collection includes contributions by leading academics and judges from across the common law world including senior judges from Australia Canada New Zealand and the UK The contributions engage with the theme of unity and disunity from a number of perspectives offering a rich panoply of insights into public law which significantly carry forward public law thinking across common law jurisdictions setting the agenda for future research and legal development Part 1 of the volume contains chapters which offer doctrinal and theoretical perspectives Some chapters seek to articulate a unifying framework for understanding public law while others seek to demonstrate the plurality of public law through the method of legal taxonomy A number of chapters analyse whether different fields such as human rights and administrative law are merging with others considering specific unifying themes or concepts in public law The chapters in Part 2 offer comparative perspectives charting and analysing convergence and divergence across common law systems Specific topics include standing proportionality human rights remedies use of foreign precedents legal transplants and disunity and unity among subnational jurisdictions The collection will be of great interest to those working in public law

The Unity of the Common Law Alan Brudner, Jennifer M. Nadler, 2013 The structure of common law has for many years been the subject of intense debate between formalists and functionalists The former drawing on legal realism proposes that transactional law is a private law for interacting parties while the later inspired by Kant argue it is a public law serving the collective ends of society But what if there were a unity between functionalism and formalism What if in this unity private law is modified by a common good In this revised and re-written edition Alan Brudner draws on Hegel's legal philosophy to exhibit this unity in each of transactional law's main divisions property contract unjust enrichment and tort Brudner suggests each of these divisions is composed of private law and public law parts that complement each other and that they are connected by a single narrative thread This thread consists in development towards a goal

Philosophical Foundations of Private International Law Roxana Banu, Michael S. Green, Ralf Michaels, 2024-05-22 Private international law has long been understood as a doctrinal and technical body of law without interesting theoretical foundations or implications By systematically exploring the rich array of philosophical topics that are part of the fabric of private international law *Philosophical Foundations of Private International Law* fills a significant and long standing void in the legal and philosophical literature The contributions to this volume are testimony to the significant potential for interaction between philosophy and private international law Some aim to expand and rethink classical jurisprudential theories by focusing on law beyond the state and on the recognition of foreign law and judgments in domestic courts Others bring legal and moral theories to bear on traditional debates in private international law such as legal pluralism transnational justice the interpretation of foreign legal policies and the boundaries of the legal system Several engage with the history of both private international law and legal and political philosophy They

point to missed opportunities when philosophers ignored law's transnational dimensions or when private international law scholars failed to position their theories within broader philosophical schools of thought. Some seek to complete past attempts to articulate the philosophical dimensions of private international law that were never carried through. Thought provoking and topical, this volume displays the varied themes cutting through the disciplines of private international law and philosophy.
