Handbook of Research on Equity in Computer Science in P-16 Education Keengwe, Jared,Tran, Yune,2020-11-13 The growing trend for high quality computer science in school curricula has drawn recent attention in classrooms With an increasingly information based and global society computer science education coupled with computational thinking has become an integral part of an experience for all students given that these foundational concepts and skills intersect cross disciplinarily with a set of mental competencies that are relevant in their daily lives and work While many agree that these concepts should be taught in schools there are systematic inequities that exist to prevent students from accessing related computer science skills The Handbook of Research on Equity in Computer Science in P 16 Education is a comprehensive reference book that highlights relevant issues perspectives and challenges in P 16 environments that relate to the inequities that students face in accessing computer science or computational thinking and examines methods for challenging these inequities in hopes of allowing all students equal opportunities for learning these skills Additionally it explores the challenges and policies that are created to limit access and thus reinforce systems of power and privilege The chapters highlight issues perspectives and challenges faced in P 16 environments that include gender and racial imbalances population of growing computer science teachers who are predominantly white and male teacher preparation or lack of faculty expertise professional development programs and more It is intended for teacher educators K 12 teachers high school counselors college faculty in the computer science department school administrators curriculum and instructional designers directors of teaching and learning centers policymakers researchers and students

Let's Talk AI Barbara Steffen,Edward A. Lee,Bernhard Steffen,2025-10-27 This unique open access volume represents an interdisciplinary dialog with top class researchers and practitioners on the Artificial Intelligence revolution The contributions derive from structured interviews with community leaders who examine recent developments in AI and offer predictions about its impact on science technology business and society The interviewees leading thinkers and practitioners from fields such as Computer Science Software Engineering Philosophy Psychology and Law gathered at the multidisciplinary event AISoLA where they discussed developments in AI technologies tools and research and these exchanges were shaped into this coherent survey In the

debates surrounding the rapid advancement of AI it s clear that while there is much sharing of ideas in fact true cooperation and alignment is rare most fields still operate in silos Given the pervasive nature of AI it s critical that we move forward carefully to ensure that our decisions and progress are well considered This book serves as a call to action reminding us of our collective responsibility to shape the future The authors offer points of agreement and contrast the reader will better understand how we may still maintain control over technological progress in AI and its societal impact
