Analysis Components:	<i>Mary Ainsworth: Attachment and the Growth of Love</i> [Video file]. (2005). Retrieved August 25, 2022 from https://vod.infobase.com/PortalPlaylists.aspx?wiD=107300&xti:d=44897
The main purpose of this research: [State as accurately as possible the purpose of the research developing a theory in child development.]	The primary purpose of this research was to study how infants develop love for their primary caregiver. The video shows separation anxiety and how the infants responded to their caregiver's return (aka what attachment style they have with their primary caregiver).
The point of view: [Identify the position or point of view the video wants you to align with. Who, or what group, is represented?]	The point of view is that of the infant/toddler; it shows how they observe the experiment and the distress felt when their primary caretaker leaves them alone or with a stranger.
The arguments (main points) the video makes: [Describe physical, social, and cognitive aspects of child development discovered.]	Physically you can see how the child reacts to the different people in the room. They tend to be more secure with their primary caretaker and standoffish/afraid around strangers. Social aspects are similar to the physical; you can see how the child is socializing and the changes that occur when the primary caretaker is present versus removed.
What other theories seem to relate to this case study? [Summarize and cite at least one other theory]	Piaget's Developmental Theory relates to this theory and is also associated with our coursework thus far. The approach focuses on how children learn and the different learning styles. It could be assumed that a child's attachment may impact their learning style, but both are tied together because both focus on children's ability to
