Young was invited to join a German commission appointed to find an appropriate design for a national memorial in Berlin to the European Jews killed in World War II. As the only foreigner and only Jew on the panel, Young gained a unique perspective on Germany's fraught efforts to memorialize the Holocaust. In this book, he tells for the first time the inside story of Germany's national Holocaust memorial and his own role in it. In exploring Germany's memorial crisis, Young also asks the more general question of how a generation of contemporary artists can remember an event like the Holocaust which it never knew directly. Young examines the works of a number of vanguard artists in America and Europe, including Art Spiegelman, Shimon Attie, David Levinthal, and Rachel Whiteread, all born after the Holocaust but indelibly shaped by its memory as passed down through memoirs, film, photographs, and museums. In the context of the moral and aesthetic questions raised by these avant-garde projects, Young offers fascinating insights into the controversy surrounding Berlin's newly opened Jewish museum designed by Daniel Libeskind, as well as Germany's soon-to-be built national Holocaust memorial designed by Peter Eisenman. Illustrated with striking images in color and black and white, *At Memory's Edge* is the first book in any language to chronicle these projects and to show how we remember the Holocaust in the after-images of its history.

This is the first volume to bring together leading memory researchers and clinicians with the aim of facilitating a resolution to this question. The volume offers a unique and timely summary of the theories of memory recovery and how false memories may be created. Some of the first research relating to the phenomenal characteristics of memory recovered is reported in detail, suggesting important avenues for new research. Theories of autobiographical memory, implicit memory, reminiscence, and the effects of repeated recall on memory are included. *Recovered memories and false memories* provides the most current and authoritative thinking in this area and will be an essential sourcebook for memory researchers and psychotherapists.
