Healthtech Innovation Silvia Micalo,2022-10-03 Today over 500 000 medical technologies are available in hospitals homes and community care settings They range from simple bandages to complex multi part body scanners that cost millions

of dollars to develop Yet a typical technology has a lifecycle of just 21 months before an improved product usurps it the healthcare ecosystem is rapidly advancing and driven by a constant flow of innovation And those innovations need innovators With 21 billion made available for investment in the digital healthcare industry in 2020 a 20x increase on 2010 entrepreneurs investors and related actors are entering the healthcare ecosystem in greater numbers than ever before Last year alone over 17 000 medical technology patents were filed the third highest of all patent types Each of those has a dedicated team of entrepreneurs behind it Yet with increasingly strict regulations and pharmaceutical giants growing more aggressive many thousands of entrepreneurs fail before even the patent stage just 2% secure revenue or adoption Healthtech Innovation How Entrepreneurs Can Define and Build the Value of Their New Products is a down to earth survival guide for entrepreneurs struggling to secure a strategic position within the healthtech ecosystem Which is expected that by 2026 the global digital health market size will be around 657 billion This book is designed to help innovators navigate this complex and newly volatile landscape It covers business strategy marketing funding acquisition and operation in a global regulatory context It is written in simple language evidenced by the latest academic and industry research and explained using real world examples and case studies

Blockchain Melanie Swan,2015-01-24 Bitcoin is starting to come into its own as a digital currency but the blockchain technology behind it could prove to be much more significant This book takes you beyond the currency Blockchain 1 0 and smart contracts Blockchain 2 0 to demonstrate how the blockchain is in position to become the fifth disruptive computing paradigm after mainframes PCs the Internet and mobile social networking Author Melanie Swan Founder of the Institute for Blockchain Studies explains that the blockchain is essentially a public ledger with potential as a worldwide decentralized record for the registration inventory and transfer of all assets not just finances but property and intangible assets such as votes software health data and ideas Topics include Concepts features and functionality of Bitcoin and the blockchain Using the blockchain for automated tracking of all digital endeavors Enabling censorship resistant organizational models Creating a decentralized digital repository to verify identity Possibility of cheaper more efficient services traditionally provided by nations Blockchain for science making better use of the data mining network Personal health record storage including access to one s own genomic data Open access academic publishing on the blockchain This book is part of an ongoing O Reilly series Mastering Bitcoin Unlocking Digital Crypto Currencies introduces Bitcoin and describes the technology behind Bitcoin and the blockchain Blockchain Blueprint for a New Economy considers theoretical philosophical and societal impact of cryptocurrencies and blockchain technologies

Integration of Blockchain Components in the Electricity Balance Area Management Andrei Gladikov,2019-05-15 Master s Thesis from the year 2019 in the subject Energy Sciences grade 1 8 University of Freiburg language English abstract This thesis is aimed to estimate the severity of recent balancing costs fallen onto balancing responsible parties BRPs the quality of forecast incentive and prove a blockchain based secondary flexibility market with quota mechanism of trading activation rights an

efficient and economically viable tool for BRPs for offsetting schedule deviations at short notice After developing a prosumer enabled model which is system integrated complying with existing balancing management various scenarios of deviations exchange are emulated The focus of this work is set to justify the sufficiency of strategic value in blockchain technology as the market underlying infrastructure and as a complementary layer for the established data exchange platform This thesis identifies blockchain benefits and regulatory challenges for synchronization of multiple flexibility providers creating and managing deviations conscious balancer communities resulting in energy balancing costs reduction enabling innovative business models and additional revenue streams for balancing groups The increasing uncertainty of the power supply in Germany due to the surge in fluctuating renewable energy power plant failures and accidental changes in consumption lead to the energy system imbalance This not only threatens the system security but also turns into financially punitive consequences for energy market players Current market based solutions and the German established data exchange platform with market rules MaBiS do not foster a bottom up collaboration in balancing groups to timely offset schedule deviations The capability to modify and or shift consumption of industrial or commercial end customers as well as to adjust energy output of generation units gives a unique opportunity for organizing a shared platform for flexibility services exchange to mitigate the risk of paying imbalance tariff
