The Manacle:

Egyptian Deportations of the Late Bronze Age Christian Langer, 2021-09-20 Egyptian Deportations of the Late Bronze Age explores the political economy of deportations in New Kingdom Egypt ca 1550-1070 BCE from an interdisciplinary angle. The analysis of ancient Egyptian primary source material and the international correspondence of the time draws a comprehensive picture of the complex and far-reaching policies. The dataset reveals their geographic scope, economic and demographic impact in Egypt and abroad, as well as their interconnection with territorial expansion, international relations, and labour management. The supply chain, profiting institutions, and individuals in Egypt, as well as the labour tasks, origins, and the composition of the deportees, are discussed in detail. A comparative analytical framework integrates the Egyptian policies with a review of deportation discourses, as well as historical premodern and modern cases, and enables a global and diachronic understanding of the topic. The study is thus the first systematic investigation of deportations in ancient Egyptian history and offers new insights into Egyptian governance that revise previous assessments of the role of forced migration and unfree labour in ancient Egyptian society and their long-term effects. *The Pinkerton Detective Series*, 1886

The Manacle Mario J. Sagola, 1979 Somewhere in the city, a killer is hiding. No Exit. In a locked room deep in the heart of Little Italy, an elegant Englishman holds an elderly woman at gunpoint. Rosa Parma shows no fear! He holds the murder weapon, she the weapon of faith. Imprisoned together, they wait for the end of the manhunt, she for her family's return, for the fugitive. This is a chance encounter, a temporary sanctuary. A sanctuary is sacred. They both believe that. But for Mama Rosa, the family is more so. Above all, the fearless woman in the wheelchair will protect her own against the terror of the man with the Manacle.

Topological Polymer Chemistry Yasuyuki Tezuka, Tetsuo Deguchi, 2022-02-25 This book provides a comprehensive description of topological polymers, an emerging research area in polymer science and polymer materials engineering. The precision polymer topology designing is critical to realizing the unique polymer properties and functions leading to their eventual applications. The prominent contributors are led by Principal Editor Yasuyuki Tezuka and Co-Editor Tetsuo Deguchi. Important ongoing achievements and anticipated breakthroughs in topological polymers are presented with an emphasis on the spectacular diversification of polymer constructions. The book serves readers collectively to acquire comprehensive insights over exciting innovations ongoing in topological polymer chemistry, encompassing topological geometry, analysis, classification, physical characterization by simulation, and the eventual chemical syntheses, with the supplementary focus on the polymer folding invoked with the ongoing breakthrough of the precision AI prediction of protein folding. The current revolutionary developments in synthetic approaches, specifically for single cyclic ring polymers and the topology-directed properties, functions uncovered thereby, are outlined as a showcase example. This book is especially beneficial to academic personnel in universities and to researchers working in relevant institutions and companies. Although the level of the book is advanced, it can serve as a good reference book for graduate

students and postdocs as a source of valuable knowledge of cutting edge topics and progress in polymer chemistry
