The blockchain has already changed the world in so many ways and most of us aren't even aware that the systems we've used every day have changed. Not every blockchain is decentralized; some still have a centralized intermediary. Not every blockchain is open source. Banks, governments, and financial institutions are all maintaining control, but in a more open, secure way that is far less open to fraud than previous financial transaction systems.

Crypto Steven Levy, 2001. Paranoia is a useful code to live by in the digital age. Consider every time you use a credit card, the Internet, or your mobile phone, the one thing that stands between you and everyone else knowing your business is cryptography, the making of secret ciphers. Yet rather than safeguarding this fragile privacy, powerful government forces have been fighting since the 1980s to keep crypto under their control. But while the official forces warn of unrestrained criminality and terrorism, those squared against them celebrate the possibility of a new era of empowered individuals benefitting from crypto anarchy.
