Uncertain Judgement 1st Edition:

Decision Making under Uncertainty R.W. Scholz, 1983-11-01 This volume contains the revised papers of an international symposium on research on fallacies biases and the development of decision behavior under uncertainty The papers are organized in five main sections The Introduction outlines the conceptual framework and how three of the sections Cognitive Decision Research Social Interaction and Development and Epistemology are interrelated and also how new fields such as research into developmental questions can be productively integrated In the fifth section Comments are collected which evaluate the impact of the contributions on decision research itself and also on cognitive psychology social psychology economic theory and the discipline of mathematics education

A Decision Framework for Managing the Spirit Lake and Toutle River System at Mount St. Helens National Academies of Sciences, Engineering, and Medicine, Division of Behavioral and Social Sciences and Education, Board on Environmental Change and Society, Division on Earth and Life Studies, Water Science and Technology Board, Board on Earth Sciences and Resources, Committee on Geological and Geotechnical Engineering, Committee on Long-Term Management of the Spirit Lake/Toutle River System in Southwest Washington, 2018-04-29 The 1980 eruption of Mount St Helens in southwest Washington State radically changed the physical and socio economic landscapes of the region The eruption destroyed the summit of the volcano sending large amounts of debris into the North Fork Toutle River and blocking the sole means of drainage from Spirit Lake 4 miles north of Mount St Helens As a result of the blockage rising lake levels could cause failure of the debris blockage putting the downstream population of approximately 50 000 at risk of catastrophic flooding and mud flows Further continued transport of sediment to the river from volcanic debris deposits surrounding the mountain reduces the flood carrying capacity of downstream river channels and leaves the population vulnerable to chronic flooding The legacy of the 1980 eruption and the prospect of future volcanic seismic and flood events mean that risk management in the Spirit Lake Toutle River system will be challenging for decades to come This report offers a decision framework to support the long term management of risks related to the Spirit Lake and Toutle River system in light of the different regional economic cultural and social priorities and the respective roles of federal tribal state and local authorities as well as other entities and groups in the region It also considers the history and adequacy of characterization monitoring and management associated with the Spirit Lake debris blockage and outflow tunnel other efforts to control transport of water and sediment from the 1980 and later eruptions and suggests additional information needed to support implementation of the recommended decision framework

The Art of Making Decisions Under Uncertainty Charles Yoe, 2025-09-04 Uncertainty is a part of every decision we make from the everyday to the high stakes from personal choices to professional strategy The Art of Making Decisions Under Uncertainty offers a clear practical approach to dealing with the unknown without getting stuck or overwhelmed Rather than treating uncertainty as a barrier this book invites readers to see it as a constant companion something to work with not work against Drawing on proven tools

real world examples and a wealth of practical insight it shows how to make thoughtful informed decisions even when information is incomplete priorities are competing and the path forward feels anything but clear This is not a theory heavy treatise It s a textbook guide for real people facing real decisions Grounded in decision science but written for a broad audience it bridges the gap between technical complexity and everyday practicality Whether you re leading a team managing risk shaping policy or simply trying to make better personal choices this book meets you where you are with tools that work language that makes sense and encouragement to move forward with clarity and confidence Inside you ll find

Straightforward frameworks to help you recognize and manage different types of uncertainty Practical tools and techniques you can use right away to make sound decisions in fast moving or high pressure situations Case studies and examples that bring the concepts to life and show how they apply in work leadership and daily life Fresh perspectives on failure bias and risk helping you not only avoid common pitfalls but turn setbacks into sources of insight If you ve ever hesitated at a crossroads second guessed a big decision or wished for more clarity in a world that rarely offers it this book is for you

The Art of Making Decisions Under Uncertainty is your companion in making better choices when certainty is out of reach but a good decision is still within your grasp

Quantifying Uncertainty in Subsurface Systems Céline Scheidt, Lewis Li, Jef Caers, 2018-06-19 Under the Earth s surface is a rich array of geological resources many with potential use to humankind However extracting and harnessing them comes with enormous uncertainties high costs and considerable risks The valuation of subsurface resources involves assessing discordant factors to produce a decision model that is functional and sustainable This volume provides real world examples relating to oilfields geothermal systems contaminated sites and aquifer recharge Volume highlights include A multi disciplinary treatment of uncertainty quantification Case studies with actual data that will appeal to methodology developers A Bayesian evidential learning framework that reduces computation and modeling time

Quantifying Uncertainty in Subsurface Systems is a multidisciplinary volume that brings together five major fields information science decision science geosciences data science and computer science It will appeal to both students and practitioners and be a valuable resource for geoscientists engineers and applied mathematicians Read the Editors Vox eos org editors vox quantifying uncertainty about earths resources
