Christian Democracy in Europe David L. Hanley, 1994 Recent years have witnessed the development of new Christian Democratic movements in Northern and Eastern Europe and the *The new democracy, a fragment of Caucasian history* New democracy, 1885 **Institutions, Opposition Behavior, and the Fates of Governments in Parliamentary**

Democracies Ko Maeda, 2005 **Darwinism, Dominance, and Democracy** Albert Somit, Steven Peterson, 1997-03-25

Somit and Peterson seek to explain two apparently contradictory yet well established political phenomena First throughout human history the vast majority of political societies have been authoritarian Second notwithstanding this pattern from time to time democracies do emerge and some even have considerable stability A neo Darwinian approach can help make sense of these observations Humans social primates have an inborn bias toward authoritarian life based on their tendency to engage in dominance behavior and the formation of dominance hierarchies Reinforcing this bias is an impulse toward obedience These factors are associated with the propensity of humans to accept authoritarian systems Nonetheless the authors argue conditions of material abundance combined with another human characteristic indoctrinability can foster the emergence and maintenance of democracies Somit and Peterson assert that an understanding of human nature from an evolutionary perspective can help to explain how and why political systems have developed They conclude by pointing to policy implications that might enhance the odds of formation and continuation of democratic forms of government Students and scholars of political science and philosophy sociology and human biology will find this an intriguing study
