Uncompromising Cheb:

Networking and Career Strategies in Late Habsburg Monarchy and its Successor States Alice Velková, 2025-12-18 This comparative study of elite formation and social mobility in Central and Eastern Europe in the 19th and early 20th centuries focuses on Bohemia and Transylvania as representatives of different administrative systems Cisleithanian and Transleithanian within the Habsburg Monarchy Through 20 richly contextualized microhistorical case studies the book illustrates the changing roles of education professional networks and political transformations particularly those occurring in 1848 1867 1918 and 1938 in shaping career paths and achieving elite status as high ranking state officials and Members of Parliament Furthermore it explores the extent to which membership in various groups ethnic religious social educational professional influenced the intensity and success in the processes of social mobility This innovative approach combining comparative analysis and detailed reconstruction of relational networks including their visualizations offers insights into the structures and strategies that underpinned the formation of the elite during a period of rapid social transformation This volume will appeal to scholars students and general readers interested in Central European history and social mobility

The Magnificent Ride Thomas A. Fudge, 2018-03-29 The Magnificent Ride examines the social and religious dimensions of the Hussite revolutionary movement in 15th century Bohemia It argues that the magnificent ride was in fact the first reformation and not merely a precursor to the reformations of the 16th century The religious revival which had begun in Prague in the later middle ages reached its zenith in the period between Jan Hus and the Council of Basel This book reconstructs the Hussite myth and shows how that myth evolved into the historical phenomenon of heresy Acts of heretical practice in Bohemia condemnation of Jan Hus defiance of ecclesiastical authority and attempts by the official church to deal with the dissenters are fascinating chapters in the history of late medieval Europe

Reframing Treaties in the Late Medieval and Early Modern West, 2025-08-02 The history of peacemaking has traditionally been reduced to isolated case studies and seen as the prelude to the presumed universal and modern international order Countering this one dimensional and Eurocentric narrative this multi authored volume reconceptualizes peace treaties as a range of successful and failed agreements settlements truces leagues and other forms of conflict resolution thus recovering their multilayered history throughout the medieval and early modern period Rather than a series of great treaties peacemaking is reframed as a flexible phenomenon a political grammar whose complexity is reflected in its variety of forms and sources Drawing on both diplomatic history and international relations studies this volume traces the central role that peacemaking has played in the political history of the Western World
