Women Musicians in Victorian Fiction, 1860-1900 Phyllis Weliver, 2016-07-28

Over the first half of the nineteenth century writers like Austen and Bront confined their critiques to satirical portrayals of women musicians. Later however a marked shift occurred with the introduction of musical female characters where they were positively to be feared. First published in 2000 this book examines the reasons for this shift in representations of female musicians in Victorian fiction from 1860-1900. Focusing on changing gender roles, musical practices and the framing of both of these scientific discourses, the book explores how fictional notions of female musicians diverged from actual trends in music making. This book will be of interest to those studying nineteenth century literature and music.

In a stimulating interchange between feminist studies and biology Banu Subramaniam explores how her dissertation on flower color variation in morning glories launched her on an intellectual odyssey that engaged the feminist studies of sciences in the experimental practices of science by tracing the central and critical idea of variation in biology. Subramaniam reveals the histories of eugenics and genetics and their impact on the metaphorical understandings of difference and diversity that permeate common understandings of differences among people exist in contexts that seem distant from the so called objective hard sciences. Journeying into interdisciplinary areas that range from the social history of plants to speculative fiction Subramaniam uncovers key relationships between the life sciences, women's studies, evolutionary and invasive biology and the history of ecology and how ideas of diversity and difference emerged and persist in each field.
