

SOCIAL ACTION THEORY

Social Action Theory is a theory that attempts to examine people's actions and the underlying reasons for those actions. Below are four types of social actions proposed by sociologist Max Weber.

VALUE-RATIONAL ACTION

Action based on a commitment to a set of personal values or beliefs, e.g. the pursuit of social justice.

RATIONALLY PURPOSEFUL ACTION

Goal-oriented action that occurs as a result of rational decision-making, e.g. firing lazy employees to save money.

AFFECTIVE ACTION

Action based on emotions rather than rationality, e.g. crying at the death of an entirely fictional movie character.

TRADITIONAL ACTION

Action based on ritual, tradition, and cultural norms. e.g. putting up a Christmas tree on December 1st.

Theory Of Reasons For Action:

Reasons for Action David Sobel, Steven Wall, 2009-04-27 What are our reasons for acting Morality purports to give us these reasons and so do norms of prudence and the laws of society The theory of practical reason assesses the authority of these potentially competing claims and for this reason philosophers with a wide range of interests have converged on the topic of reasons for action This volume contains eleven essays on practical reason by leading and emerging philosophers Topics include the differences between practical and theoretical rationality practical conditionals and the wide scope ought the explanation of action the sources of reasons and the relationship between morality and reasons for action The volume will be essential reading for all philosophers interested in ethics and practical reason A Theory of Reasons for Action David A. J. Richards, 1971 **Action in Context** Anton Leist, 2012-02-13 The book illustrates the concept of action in three different contexts the justification of actions people's life history and pragmatism The special feature of this book is that a comprehensive view of this kind marks a departure from the atomistic approach of action theory which in itself raises a number of questions If actions are not justified by mental states how can persons then act for reasons How can persons actions over time be described and what is the connection with the question of personal identity If there is to be a unified understanding of the person does the practical have to take precedence over the theoretical and what does this mean for epistemology for example The ten contributors to this volume engage in an instructive manner with these and similar questions in the three sections of the book *The Oxford Handbook of Consequentialism* Douglas W. Portmore, 2020 Provides an authoritative and comprehensive overview of consequentialism today Includes a brief summary of the anthology's four parts and a concise primer on the nature and importance of the consequentialism nonconsequentialism distinction Relates consequentialism to the significant reform movements calling for environmentalism effective altruism animal liberation and women's liberation Book jacket *Oxford Handbook of Reasons and Normativity* Daniel Star, 2018-05-31 The Oxford Handbook of Reasons and Normativity maps a central terrain of philosophy and provides an authoritative guide to it Few concepts have received as much attention in recent philosophy as the concept of a reason to do or believe something And one of the most contested ideas in philosophy is normativity the ought in claims that we ought to do or believe something This is the first volume to provide broad coverage of the study of reasons and normativity across multiple philosophical subfields In addition to focusing on reasons in ethics epistemology and the philosophy of mind action and language the Handbook explores philosophical work on the nature of normativity in general Topics covered include the unity of normativity the fundamentality of reasons attempts to explain reasons in other terms the relation of motivational reasons to normative reasons the internalist constraint the logic and language of reasons and ought connections between reasons intentions choices and actions connections between reasons reasoning and rationality connections between reasons knowledge understanding and evidence reasons encountered in perception and testimony moral principles prudence and reasons agent

relative reasons epistemic challenges to our access to reasons normativity in relation to meaning concepts and intentionality instrumental reasons pragmatic reasons for belief aesthetic reasons and reasons for emotions *Action and Its Explanation* David-Hillel Ruben,2003 David Hillel Ruben s new book pursues some novel and unusual standpoints in the philosophy of action He rejects for example the most widely held view about how to count actions and argues for what he calls a prolific theory of act individuation He also describes and argues against the two leading theories of the nature of action the causal theory and the agent causal theory The causal theory cannot account for skilled activity nor for mental action The agent causalist theory unnecessarily reifies causings He identifies an assumption that they share and that most action theorists have assumed to be unproblematic and uncontroversial that an action is or entails the existence of an event Several different meanings to that claim are disentangled and in the most interesting sense of that claim Ruben denies that it is true His own alternative is simple and unpretentious nothing informative can be said about the nature of action that explicates action in any other terms Ruben sketches a theory of causal explanation of action that eschews the requirement for laws or generalisations and this effectively quashes one argument for the oft repeated view that no explanations of action can be causal on the grounds that there are no convincing cases of laws of human action He addresses a number of questions about the knowledge an agent has of his own actions looking particularly at examples of pathological cases of action in which for one reason or another the agent does not know what he is doing Inspiring and enlightening in its challenge to received wisdom and in its convincing defence of some unfashionable positions *Action and its Explanation* will be required reading for anyone working in this field *Reasons and Reason-governed Actions* Ingmar Persson,1981 *Reasons for Action* David Sobel,Steven Wall,2009-04-27 This volume contains eleven essays on practical reason by leading and emerging philosophers *Arguments and Actions in Social Theory* P. yield in part to philosophical inquiry they may need to be rethought by each age in the light of its broader scientific knowledge and deepened ethical and religious experience Better solutions are found by more refined and rigorous methods Thus one who approaches the study of philosophy in the hope of understanding the best of what it affords will look both for fundamental issues and contemporary achievements Reasons for Action and the Law Cristina Redondo,1999-07-31 A focus on reasons for action and practical reason is the perspective chosen by many contemporary legal philosophers for the analysis of some central questions of their discipline This book offers a critical evaluation of that approach by carefully examining the empirical logical and normative problems hidden behind the concepts of reason for action and practical reasoning Unlike most other works in this field it is a meta theoretical study which analyses and compares how different theories use the notion of reason in their reconstruction of problems concerning issues such as normativity the acceptance of norms or the justification of judicial decisions This book is directed primarily to scholars specializing in legal theory and concerned with the contribution practical philosophy can make to it but it also contains important arguments and insights for all those interested in the controversy between legal positivists and their critics in the theory of human action or in reason based practical theories in general *The Nature of Human Action* Myles Brand,William K. Frankena,1970 Power and Pleasure Dirk Baltzly,Dougal Blyth,Harold Tarrant,2001 *The New York Supplement* ,1900 The Dictionary of Modern American Philosophers: R-Z John R. Shook,Richard T.
