Learning in the Digital Age David Kergel, Peter Pericles Trifonas, Arkaitz Letamendia, Michael Paulsen, Samuel Nowakowski, Patrik Kjærdsdam Tellús, Tadeusz Rachwał, Birte Heidkamp-Kergel, 2022-03-04 The essays in this volume all seek to answer the following broad question How can philosophical educational and critical approaches to corporate communications deepen our understanding of learning in the digital age The authors reflect on how particular approaches learning strategies philosophers or critical theorists can advance the theory and practice of teaching and learning in the digital age Each essay discusses key concepts from their work and relates those concepts to a particular problem within learning and teaching in the digital age

Stairway of Surprise Michael Lipson, 2002-11 A gift was given you at your first breath have you opened it It came from the stars and impressed itself into you at your most vulnerable moment In this introduction to astrophysics or star wisdom a science with ancient roots and modern relevance David Tresemer shows how the patterns written in the heavens influence a person's life Taking as an example the remarkable life of Rudolf Steiner Tresemer demonstrates the Oracle of the Solar Cross whose four points interact throughout each of our lives to shape opportunities and challenges that our souls must face Steiner spoke often of the starry script and hinted that whereas its patterns impress themselves upon the human psyche we can also influence this heavenly text altering it in service of the continued development of humanity Through stories from the life and examples from the work of Steiner as well as the Star Brothers and Sisters who share aspects of his Solar Cross Tresemer illuminates this truth Rich in art and anecdote this groundbreaking book gives insight into the foundations of Anthroposophy and shows how great acts feelings and thoughts by human beings on Earth shine out and impress their patterns into the cosmos

The Guide to the Perplexed Moses Maimonides, 2024-05-28 A landmark new translation of the most significant text in medieval Jewish thought Written in Arabic and completed around 1190 the Guide to the Perplexed is among the most powerful and influential living texts in Jewish philosophy a masterwork navigating the straits between religion and science logic and revelation The author Rabbi Moses ben Maimon commonly known as Maimonides or as Rambam was a Sephardi Jewish philosopher jurist and physician He wrote his Guide in the form of a letter to a disciple But the perplexity it aimed to cure might strike anyone who sought to square logic mathematics and the sciences with biblical and rabbinic traditions In this new translation by philosopher Lenn E Goodman and historian Phillip I Lieberman Maimonides' warm conversational voice and clear explanatory language come through as never before in English Maimonides knew well the challenges facing serious inquirers at the confluence of the two great streams of thought and learning that Arabic writers labeled *aqal* and *naql* reason and tradition The aim of the Guide he wrote is to probe the mysteries of physics and metaphysics But mysteries to Maimonides were not conundrums to be celebrated for their obscurity They were problems to be solved Maimonides' methods and insights resonate throughout the work of later Jewish thinkers rationalists and mystics and in the work of philosophers like Thomas Aquinas Spinoza Leibniz

and Newton The Guide continues to inspire inquiry discovery and vigorous debate among philosophers theologians and lay readers today Goodman and Lieberman s extensive and detailed commentary provides readers with historical context and philosophical enlightenment giving generous access to the nuances complexities and profundities of what is widely agreed to be the most significant textual monument of medieval Jewish thought a work that still offers a key to those who hope to harmonize religious commitments and scientific understanding

How History Works Martin Davies,2015-09-16

How History Works assesses the social function of academic knowledge in the humanities exemplified by history and offers a critique of the validity of historical knowledge The book focusses on history s academic disciplinary ethos to offer a reconception of the discipline of history arguing that it is an existential liability if critical analysis reveals the sense that history offers to the world to be illusory what stops historical scholarship from becoming a disguise for pessimism or nihilism History is routinely invoked in all kinds of cultural political economic psychological situations to provide a reliable account or justification of what is happening Moreover it addresses a world already receptive to comprehensive historical explanations since everyone has some knowledge of history everyone can be manipulated by it This book analyses the relationship between specialized knowledge and everyday experience taking phenomenology Husserl and pragmatism James as methodological guides It is informed by a wide literature sceptical of the sense academic historical expertise produces and of the work history does represented by thinkers such as Schopenhauer Nietzsche Val ry Anders and Cioran How History Works discusses how history makes sense of the world even if what happens is senseless arguing that behind the smoke screen of historical scholarship looms a chaotic world dynamic indifferent to human existence It is valuable reading for anyone interested in historiography and historical theory
