Your eyes may reveal much more about your health than you ever suspected. For over one hundred years, researchers have studied the links between your health and the patterns, colors, and textures of the iris. In the United States, Dr. Howard Jensen has brought the art of interpreting iris signs into the twentieth century. His advancements have made "iridology" a reliable form of analysis for thousands of practitioners in the healing arts. His methods of reading the eye have become the standard throughout the world.

In *Visions of Health*, Drs. Jensen and Hudson describe the basics of iris analysis in easy-to-understand language. They include dozens of illustrations and color photos, as well as charts for reading your own eyes and those of friends. They believe that by recognizing inherent weaknesses reflected in the iris, you can adjust your lifestyle accordingly; by picking out trouble spots, you can prevent problems before they develop. With this book in hand, you can clearly set your sights on achieving optimum health.

*About the Authors*

Dr. Howard Jensen is one of America's pioneering nutritionists and iridologists. Beginning his career in 1929 as a chiropractor, he soon turned to the art of nutrition for his own health problems. In his formative years, he studied under such giants as Lee, Tilden, Kellogg, and Berlin. His work at his Shaker Valley Ranch over the years has helped him see firsthand the value of nutrition and iridology. At age 88, he is developing a revolutionary computerized iridology program.

Dr. Donald Hudson is a practicing chiropractor with strong interests in both iridology and nutrition. He has studied under Dr. Jensen for many years. His lectures on iridology around the country. His interests include aviation, amateur "ham" radio, hiking, and photography. He resides with his family in Poughkeepsie, New York.
